

## Safe Harbor Statement

Forward-Looking Statements - Certain statements in this presentation regarding anticipated financial outcomes including Rayonier's earnings guidance, if any, business and market conditions, outlook, expected dividend rate, Rayonier's business strategies, including expected harvest schedules, timberland acquisitions, sales of non-strategic timberlands, the anticipated benefits of Rayonier's business strategies, and other similar statements relating to Rayonier's future events, developments or financial or operational performance or results, are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. These forward-looking statements are identified by the use of words such as "may," "will," "should," "expect," "estimate," "believe," "intend," "project," "anticipate" and other similar language. However, the absence of these or similar words or expressions does not mean that a statement is not forward-looking. While management believes that these forward-looking statements are reasonable when made, forward-looking statements are not guarantees of future performance or events and undue reliance should not be placed on these statements.

The following important factors, among others, could cause actual results or events to differ materially from those expressed in forward-looking statements that may have been made in this document: the cyclical and competitive nature of the industries in which we operate; fluctuations in demand for, or supply of, our forest products and real estate offerings; entry of new competitors into our markets; changes in global economic conditions and world events; fluctuations in demand for our products in Asia, and especially China; various lawsuits relating to matters arising out of our previously announced internal review and restatement of our consolidated financial statements; the uncertainties of potential impacts of climate-related initiatives; the cost and availability of third party logging and trucking services; the geographic concentration of a significant portion of our timberland; our ability to identify, finance and complete timberland acquisitions; changes in environmental laws and regulations regarding timber harvesting, delineation of wetlands, and endangered species, that may restrict or adversely impact our ability to conduct our business, or increase the cost of doing so; adverse weather conditions, natural disasters and other catastrophic events such as hurricanes, wind storms and wildfires, which can adversely affect our timberlands and the production, distribution and availability of our products; interest rate and currency movements; our capacity to incur additional debt; changes in tariffs, taxes or treaties relating to the import and export of our products or those of our competitors; changes in key management and personnel; our ability to meet all necessary legal requirements to continue to qualify as a real estate investment trust ("REIT") and changes in tax laws that could adversely affect beneficial tax treatment; the cyclical nature of the real estate business generally; a delayed or weak recovery in the housing market; the lengthy, uncertain and costly process associated with the ownership, entitlement and development of real estate, especially in Florida, which also may be affected by changes in law, policy and political factors beyond our control; unexpected delays in the entry into or closing of real estate transactions; changes in environmental laws and regulations that may restrict or adversely impact our ability to sell or develop properties; the timing of construction and availability of public infrastructure; and the availability of financing for real estate development and mortgage loans.

For additional factors that could impact future results, please see Item 1A - Risk Factors in the Company's most recent Annual Report on Form 10-K and similar discussion included in other reports that we subsequently file with the Securities and Exchange Commission ("SEC"). Forward-looking statements are only as of the date they are made, and the Company undertakes no duty to update its forward-looking statements except as required by law. You are advised, however, to review any further disclosures we make on related subjects in our subsequent reports filed with the SEC.

Non-GAAP Financial Measures - To supplement Rayonier's financial statements presented in accordance with generally accepted accounting principles in the United States ("GAAP"), Rayonier uses certain non-GAAP measures, including "cash available for distribution," and "Adjusted EBITDA," which are defined and further explained in this communication. Reconciliation of such measures to the nearest GAAP measures can also be found in this communication. Rayonier's definitions of these non-GAAP measures may differ from similarly titled measures used by others. These non-GAAP measures should be considered supplemental to, and not a substitute for, financial information prepared in accordance with GAAP.

# **Rayonier Today**

## Rayonier At A Glance

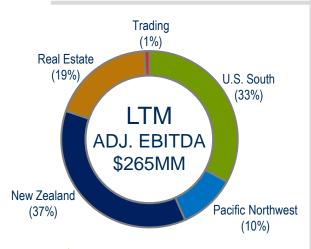

2.7 million

\$1.6 billion of timberlands acquired since 2011

Value-added
Real Estate
Platform

Sustainable yield of

~10 million tons
annually

Established in 1026

in 1926 12017 YEARS

100% certified

## Mission:

Provide industry-leading returns through intensive asset management and effective capital allocation

## **Rayonier's Strategic Priorities**

### MANAGE FOR LONG-TERM VALUE

# ACQUIRE HIGH-QUALITY TIMBERLANDS

### OPTIMIZE PORTFOLIO VALUE

# FOCUS ON QUALITY OF EARNINGS

#### ENHANCE DISCLOSURE

- Design harvest strategy to achieve long-term, sustainable yield
- Balance biological growth, harvest cash flow and responsible stewardship
- Pursue acquisitions that improve portfolio quality and sustainable yield
- Maintain disciplined approach to acquisitions, minimize HBU speculation
- Opportunistically monetize lands where premium valuations can be achieved
- Pursue value creation activities on select properties to enhance long-term value
- Focus on harvest operations and rural land sales to support dividends
- De-emphasize sale of "non-strategic" timberlands to augment cash flow
- Establish Rayonier as industry leader in transparent disclosure
- Provide investors with meaningful information about timberland portfolio

## **Execution Against Strategy (since 2014 spin-off)**

### MANAGE FOR LONG-TERM VALUE

# ACQUIRE HIGH-QUALITY TIMBERLANDS

# OPTIMIZE PORTFOLIO VALUE

# FOCUS ON QUALITY OF EARNINGS

# ENHANCE DISCLOSURE

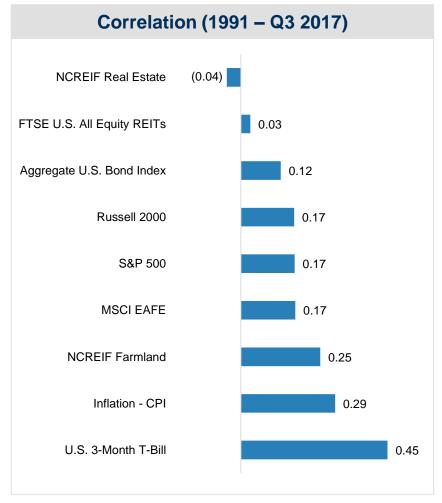

- Long range plan based on a sustainable yield harvest, with full investor visibility
- Demonstrated flexibility to adjust harvest levels to optimize long-term value
- Deferred 500,000 tons in 2016 to capitalize on stronger markets in 2017
- Acquired ~\$800 MM of timberland since spin-off (89% U.S. / 11% NZ)
- Focused acquisition efforts on high quality, CAD\* accretive properties based on market quality, site index, species mix, and merchantable timber stocking
- 2015 2017 YTD Real Estate sales of \$234 MM at average price of \$2,750 per acre
- Launched Wildlight and Belfast Commerce Park Improved Development projects
- Redeployed \$250 MM from Large Dispositions to partially fund major acquisitions
- Dividend fully funded from recurring harvest and HBU land sales
- Reduced reliance on sales of non-HBU timberland to augment cash flow
- Created "Large Dispositions"\* category to address sale of assets for capital allocation
- Committed to industry leadership in transparent investor disclosure
- Improved disclosures in key areas such as forest productivity, sustainable yield,
   EBITDA\* per ton, age class profile, and regional supply / demand dynamics

## **Historical Returns / Correlation by Asset Class**

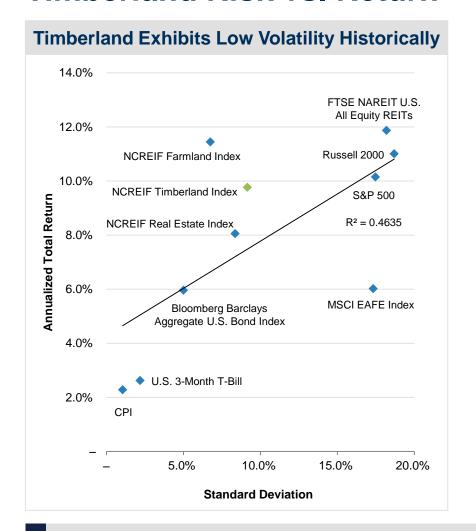

Timberland investment has consistently provided durable total returns with low correlation to the broader market and alternatives.

## Timberland Risk vs. Return

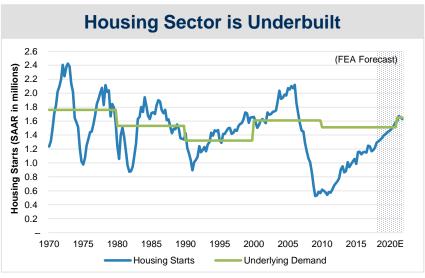

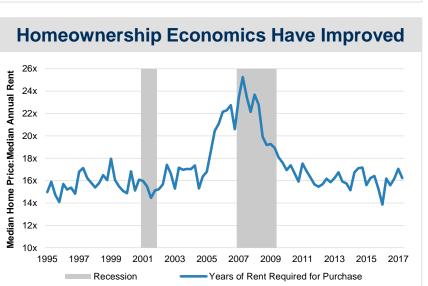

Timberland has historically achieved strong relative returns while exhibiting materially lower volatility, thus reducing portfolio risk.

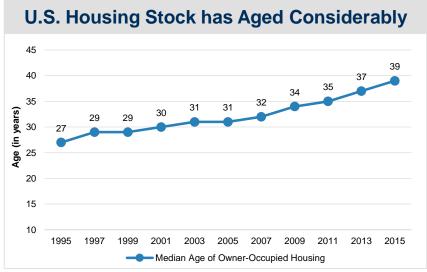

## **Housing Indicators Are Improving**

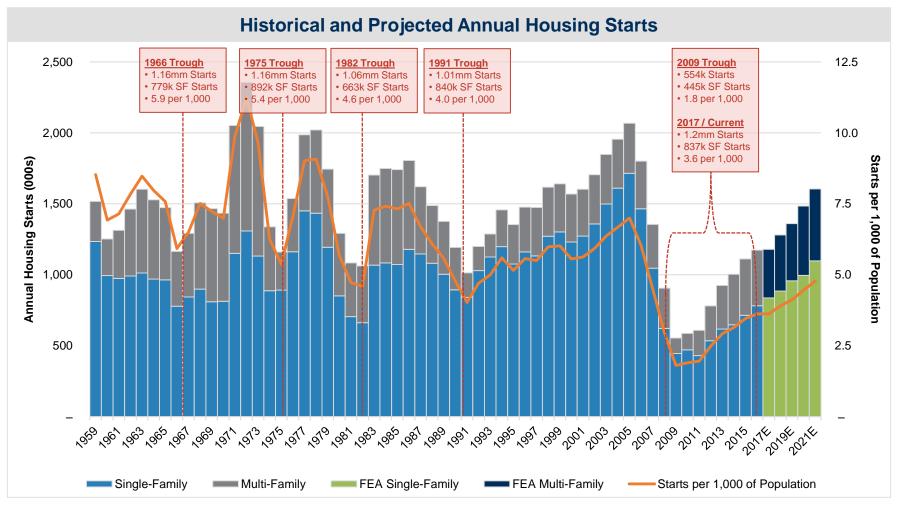

Source: Forest Economic Advisors.

Why Now?

#### 3 Why RYN?

Forest Economic Advisors projects that annual housing starts will reach 1.6 million by 2021, led by single family construction.

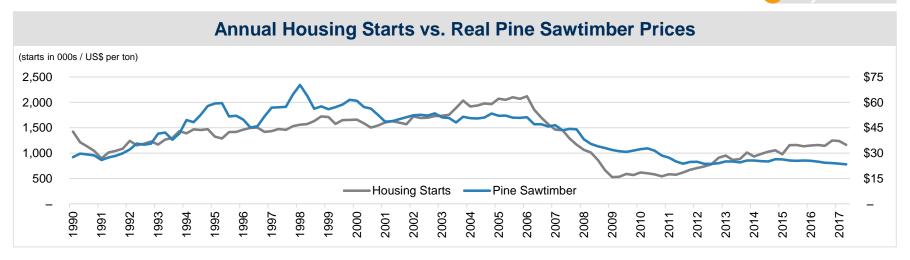

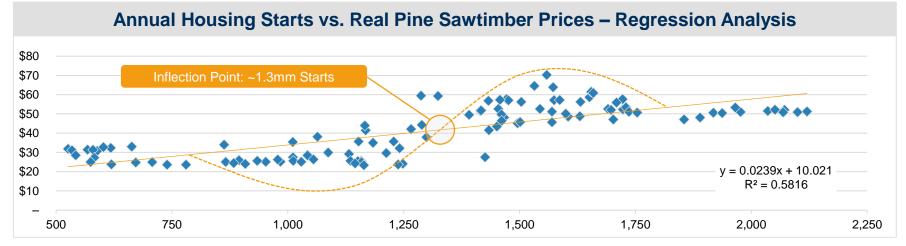

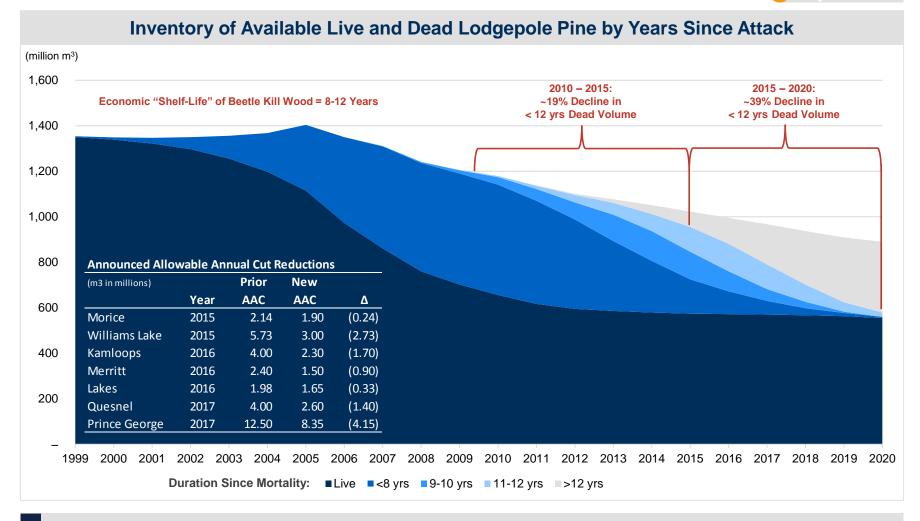

U.S. South sawtimber pricing has historically trended in line with residential construction, with a discernible inflection point at ~1.3 million starts.

### Availability of Viable B.C. Timber Is Expected to Decline Rapidly

The mountain pine beetle epidemic is expected to significantly constrain the availability of economically viable pine inventory in B.C. for many decades.

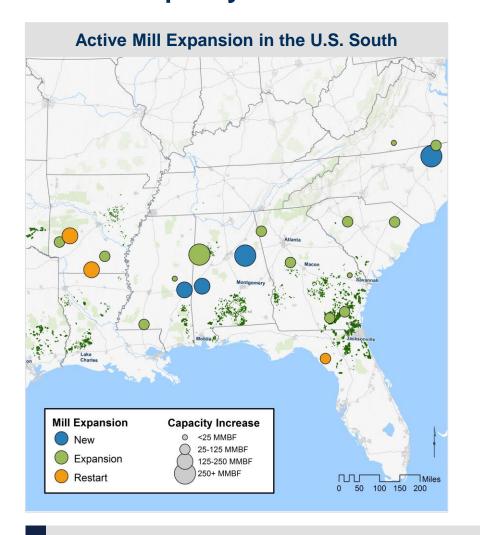

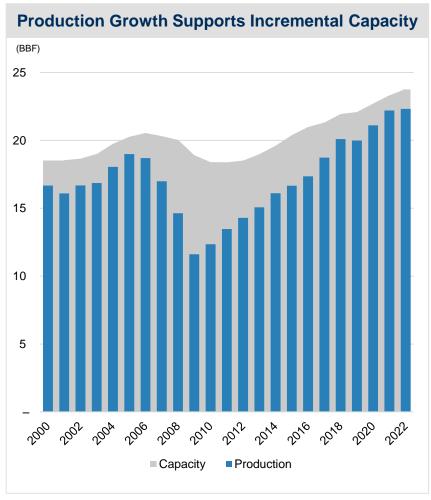

## Lumber Capacity in the U.S. South Continues to Expand

1 Why Timber?

2 Why Now?

3 Why RYN?

Lumber production and capacity in the U.S. South is expected to grow significantly over the next five years.

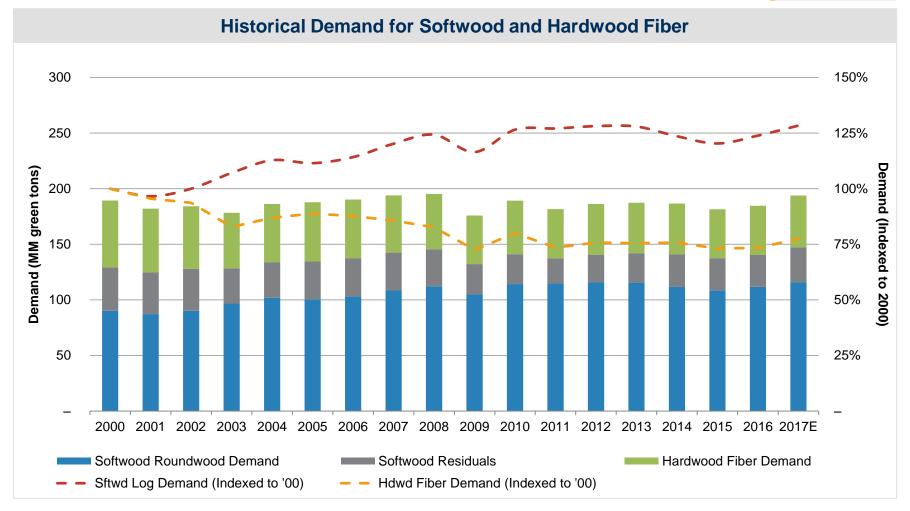

## Softwood Pulpwood Demand Growth Has Been Strong

1 Why Timber?

2 Why Now?

3 Why RYN<sup>2</sup>

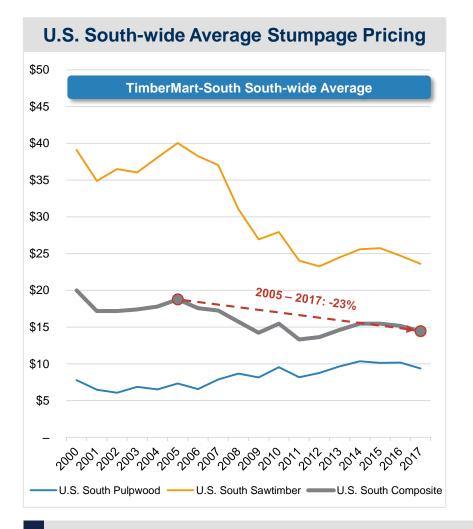

U.S. South growth in demand for softwood pulpwood has remained strong and is poised to accelerate on expanding OSB capacity investments.

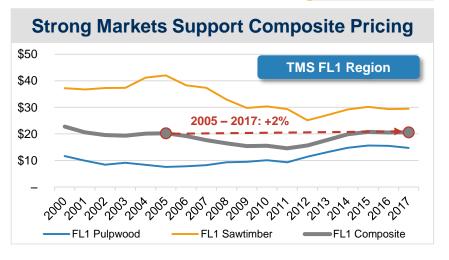

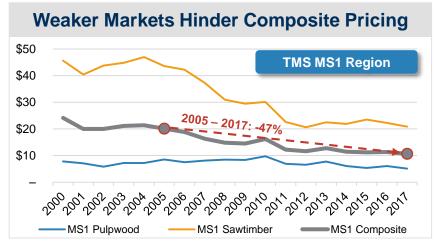

Source: Forest Economic Advisors.

## **Pulpwood Supports Composite Prices in Strong Markets**

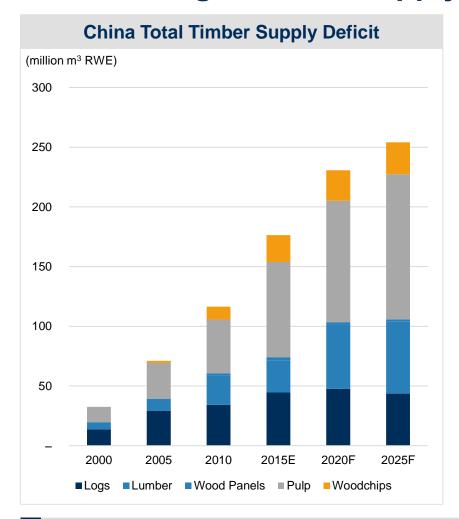

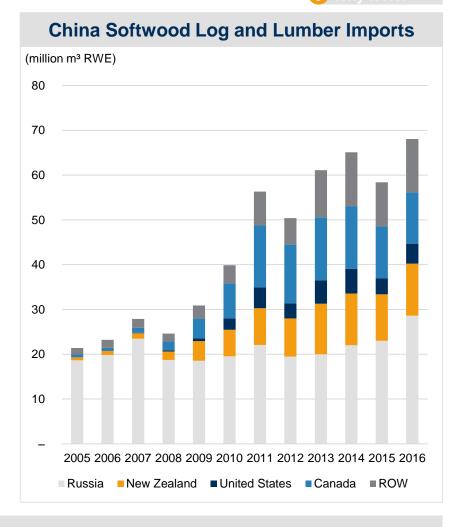

As sawtimber pricing has eroded in the U.S. South, increased pulpwood pricing has offset the overall composite price decline in strong markets where Rayonier focuses its ownership.

## **China's Large Timber Supply Deficit Growing**

Softwood log and lumber imports to China are expected to remain strong given its growing timber supply deficit.

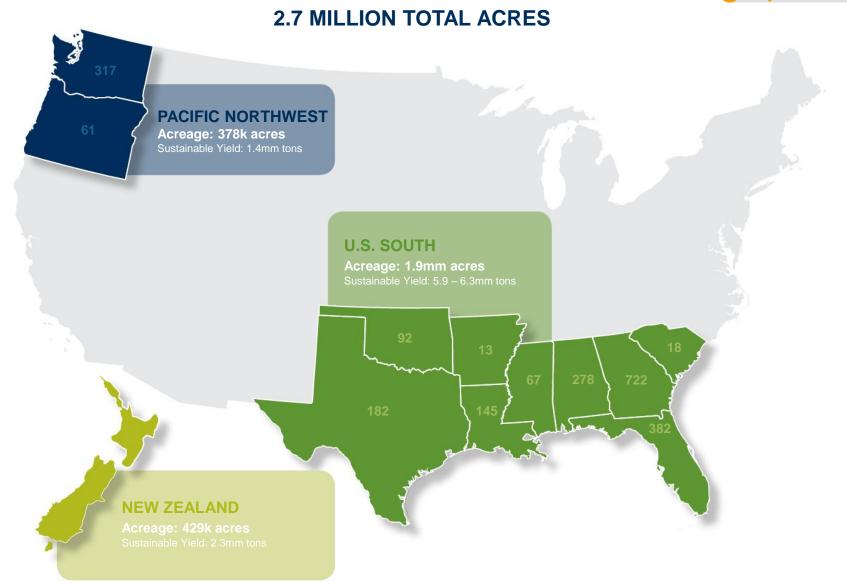

Source: RISI. RWE defined as roundwood equivalent.

1 Why Timber?

2 Why Now?

3 Why RYN?

## **Highly Productive, Geographically Diversified Timberlands**

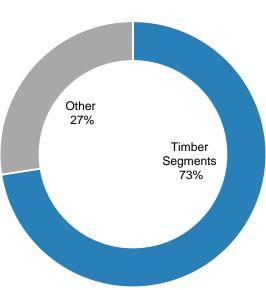

## Rayonier is the Leading "Pure Play" Timber REIT

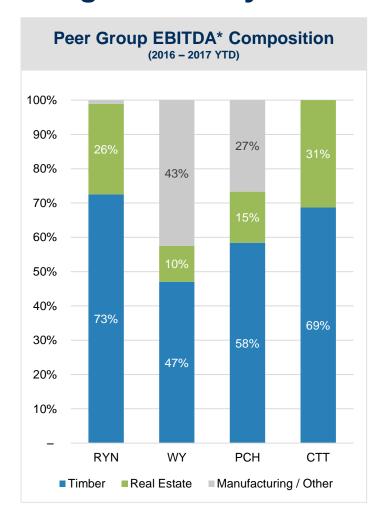

1 Why Timber?
2 Why Now?

2 Why Now

3 Why RYN?

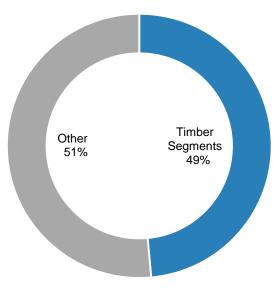

### **Peer Group**

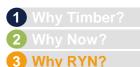

2016 – 2017 YTD EBITDA\* Composition

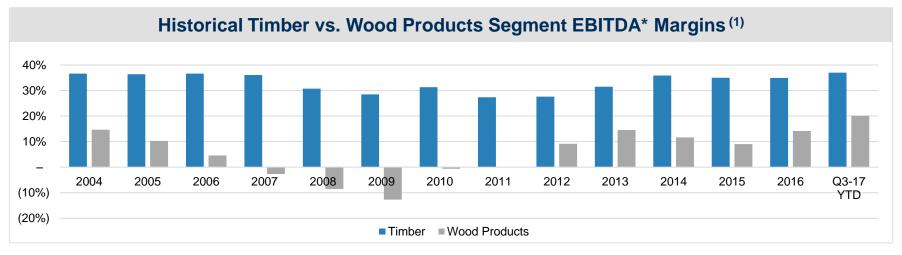

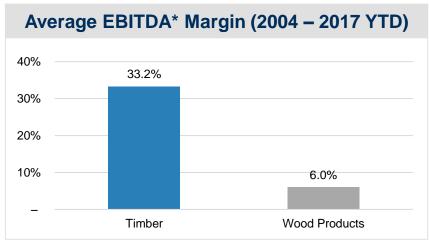

Over the last two years, Rayonier has generated 73% of its EBITDA\* from timber operations (versus 49% for the peer group).

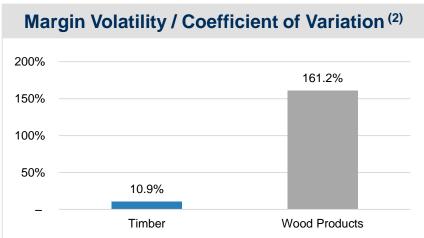

## **Timberland vs. Wood Products Volatility**

Timberland operations generally yield high EBITDA\* margins with very low volatility relative to wood products manufacturing.

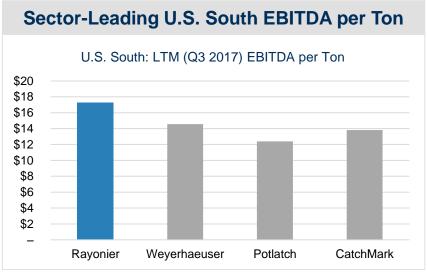

<sup>(2)</sup> Calculated as ratio of standard deviation to average.

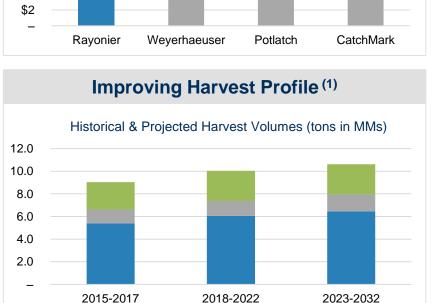

<sup>\*</sup> Non-GAAP measure or pro forma item (see Appendix for definitions and RYN reconciliations).

## **Nimble Approach to Capital Allocation**

1 Why Timber?
2 Why Now?
3 Why RYN?

# Invest in Our Business

- ~\$34 million invested annually in silviculture and regeneration
- Capital focused on highest IRR opportunities
- Targeted investments to unlock HBU value

# **Timberland Acquisitions**

- Acquired ~\$800 million of timberlands since spin-off
- Acquisitions complementary to age-class profile
- Improved portfolio site index and inventory stocking

#### Share Buybacks/ Equity Issuance

- \$101 million of stock buybacks@ \$23.76/share
- \$160 million of equity issuance@ \$27.75/share
- Focused on generating NAV accretion

#### **Dividends**

- Dividend of \$1.00 per share since Q4 2014
- Funded from recurring timber and real estate operations
- Large Dispositions\* excluded from CAD\*

# Manage Our Balance Sheet

- Restructured \$155 million of New Zealand debt
- 95% of debt fixed;3.3% avg. rate
- Maintained investment grade rating with higher debt threshold

\$34MM<sup>(1)</sup> annually for silviculture

\$800MM

Non-GAAP measure or pro forma item (see Appendix for definitions and RYN reconciliations).

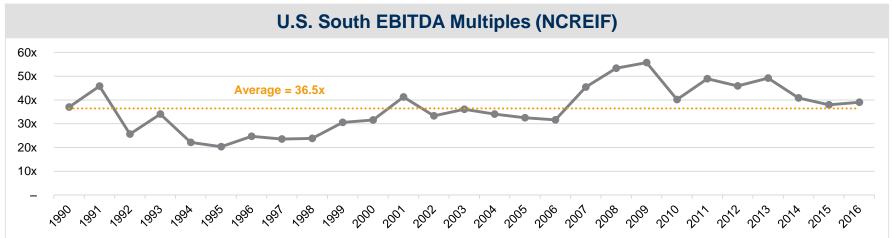

# **Deconstructing Timberland Returns**

## **U.S. South Historical Valuation Snapshot**

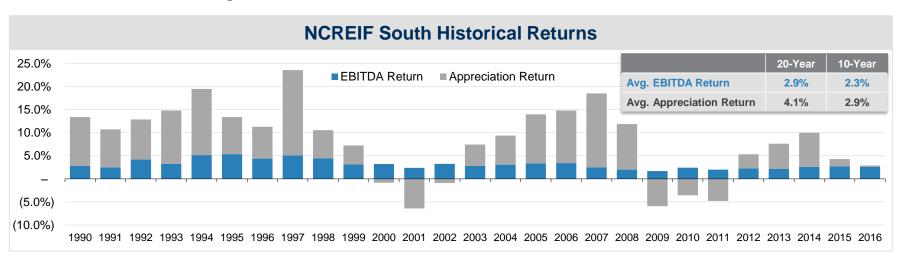

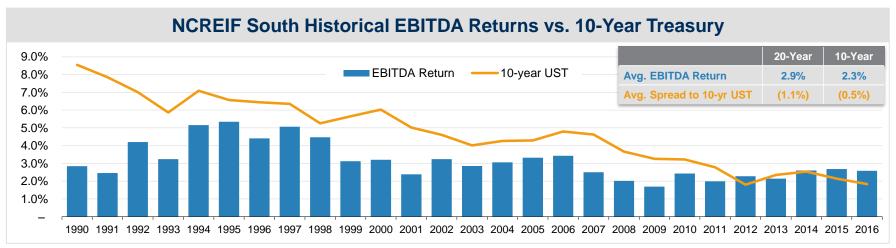

U.S. South timberlands have traded at an average EBITDA multiple (excluding land sales) of ~36x over the last 25 years.

## Historical Components of U.S. South Timberland Returns

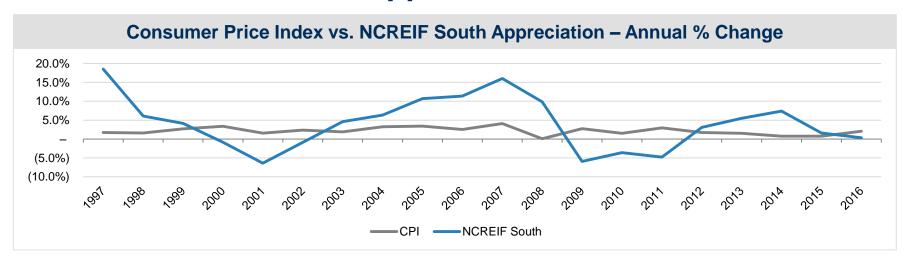

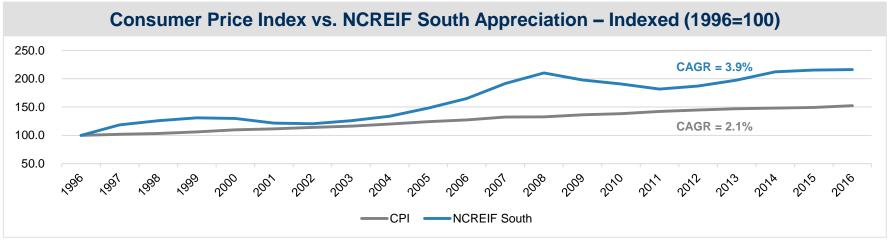

U.S. South timberlands have historically been bid to a sub-3% EBITDA cap rate and have generally exhibited a negative spread to treasuries.

## U.S. South Timberland Appreciation vs. Inflation

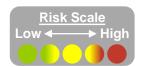

Timberland is generally considered a good inflation hedge – timberland values have increased in excess of inflation in 13 of the last 20 years.

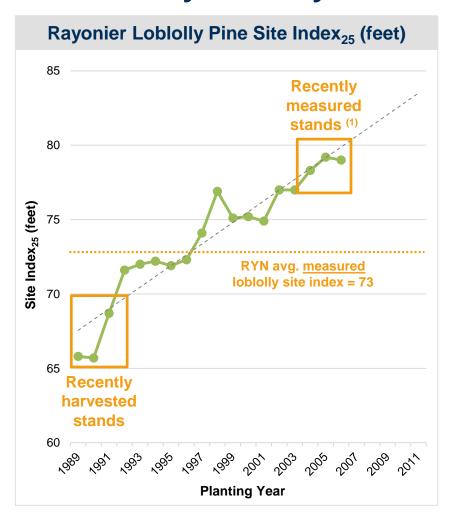

# **Components of Timberland Return – U.S. South**

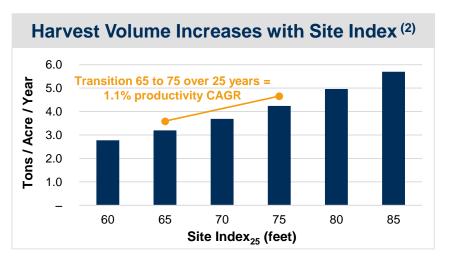

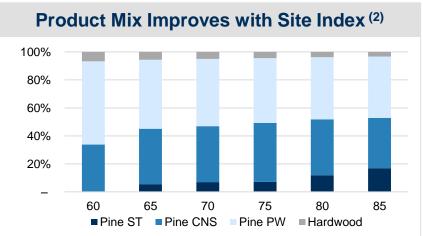

Return Component	Value Range	Risk to Achieve	Comments	
Cash Return Expectation				
EBITDA Return	2.0% – 4.5%		EBITDA yield for Southern timber, including timber harvest and non-timber income	
(-) Capex Investment	(0.5%)	00000	Average annualized cost of replanting / silviculture	
Current Cash Flow Return	1.5% – 4.0%		Varies based on market quality, site index / productivity, stocking, etc.	
Other Components of Return				
Productivity Gains	0.5% - 1.0%		Based on improved silviculture; higher gain potential on lower quality properties	
HBU Uplift	0.0% - 1.0%		Requires market for rural property; proximity to population centers is key	
Return to Trend Pricing	0.5% - 1.5%		Higher "return-to-trend" expectation is common in more depressed markets	
Long-Term "Real" Price Growth	0.0% - 1.0%		Long-term expectation of real price increases above inflation	
Total Return Expectation				
Typical "Real" Return Expectation	5.0% - 6.0%	Varies	Represents typical timberland real discount rate range	
(+) Assumed Inflation	~2.0%		Based on approximate spread between treasuries and TIPS	
"Nominal" Return Expectation	7.0% – 8.0%	Varies	Represents expected long-term, unlevered return on timberland investments	

## **Productivity is a Key Driver of Timberland Value**

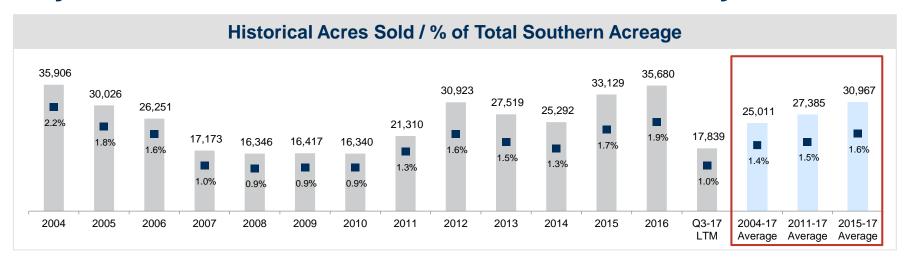

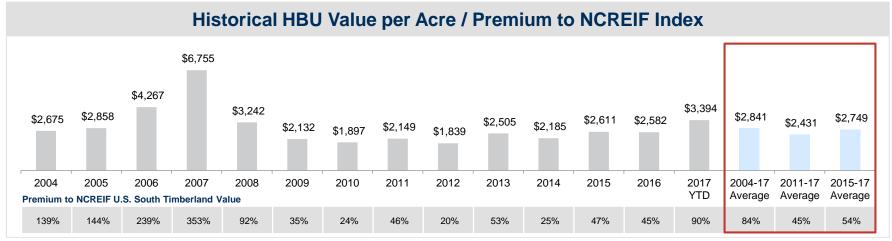

Higher site index properties generate greater harvest yields and a more valuable product mix. Improving site index by 10 feet over a 25-year harvest rotation implies ~1% annual productivity gain.

First physical site index measurement taken at age 11.
Growth and yield predictions based on PMRC 1996 (Loblolly PMRC TR-1996-1 and Slash PMRC TR-1996-3) with FMRC Fastlob 3.0 Fertilizer response equations.
Assumes mix of plantation / hardwood acreage and loblolly / slash species based on Rayonier portfolio averages.

## Rayonier Historical Real Estate / HBU Summary

Rayonier has generally sold 1.0% to 2.0% of its Southern land base annually at premiums in the range of 50% above timberland value, with premiums improving more recently.

## **Illustrative HBU Economics**

#### **Example: 1 Million Acre U.S. South Portfolio**

(\$ in 000s, excepts per acre values)

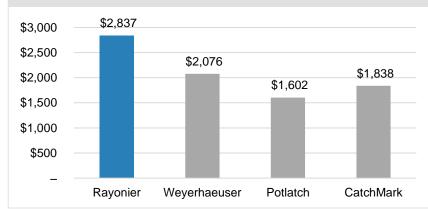

(¢ in coos, onespie per acce innacc)		
Sales Pace / Premium	1.0% / 50.0%	1.5% / 75.0%
Illustrative Asset Profile		
U.S. South Portfolio Acres (000s)	1,000	1,000
Timberland Value per Acre (1)	\$1,777	\$1,777
Implied Total Asset Value	\$1,777,000	\$1,777,000
Implied HBU Inputs		
# of Acres Sold Annually	10,000	15,000
Implied HBU Price per Acre	\$2,666	\$3,110
HBU Premium per Acre	\$889	\$1,333
HBU Contribution to Return		
HBU Sales Revenue	\$26,655	\$46,646
(–) Real Estate Overhead Costs (2)	(2,666)	(4,665)
Implied Adjusted EBITDA	\$23,990	\$41,982
(–) Acquire Replacement Timberlands (3)	(17,770)	(26,655)
Residual Cash Flow	\$6,220	\$15,327
Residual Cash Flow / Total Asset Value	0.4%	0.9%

#### **HBU Incremental Return Sensitivity Analysis**

(% incremental return)

			Premium to Timberland Value				
		_	-	25%	50%	75%	100%
		0.50%	(0.1%)	0.1%	0.2%	0.3%	0.4%
	% of	0.75%	(0.1%)	0.1%	0.3%	0.4%	0.6%
Α	creage	1.00%	(0.1%)	0.1%	0.4%	0.6%	0.8%
	Sold	1.25%	(0.1%)	0.2%	0.4%	0.7%	1.0%
		1.50%	(0.2%)	0.2%	0.5%	0.9%	1.2%

#### Peer Group Real Estate Prices (2016 - YTD 2017) (4)

A well-designed HBU program should be able to generate roughly 0.5% to 1.0% of incremental return relative to underlying timberland returns (depending on the quality of HBU product).

Assumes overhead costs of 10% of sales.

Represents average Real Estate segment sales price per acre for 2016 - YTD 2017.

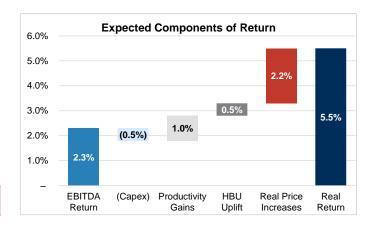

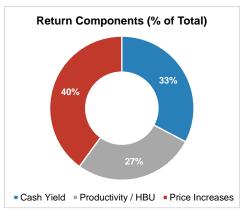

Assumes additional timberlands acquired to replace acreage sold as HBU.

## **Deconstructing Timberland Returns – Illustrative Acquisitions**

#### Illustrative Acquisition Scenario A – Low Productivity / Bottom Quartile Market

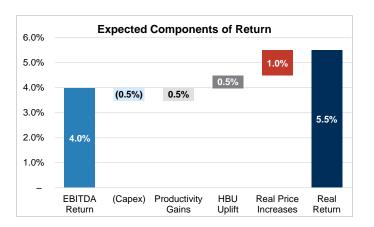

Assumed Portfolio Profile		
Location	MS-1	
Composite Stumpage Price (1)	\$11.30	
Site Index	65	
Volume per Acre per Year (2)	3.2	
Implied EBITDA per Acre (3)	\$36	
Assumed Value per Acre	\$1,600	

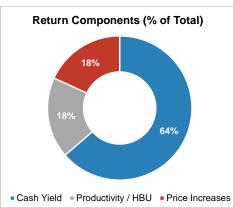

#### Illustrative Acquisition Scenario B - High Productivity / Top Quartile Market

Assumed Portfolio Profile		
Location	GA-2	
Composite Stumpage Price (1)	\$19.25	
Site Index	80	
Volume per Acre per Year (2)	5.0	
Implied EBITDA per Acre (3)	\$96	
Assumed Value per Acre	\$2,400	

Based on TimberMart-South 2016 regional average composite stumpage price assuming mix of 50% pulpwood, 30% chip-n-saw and 20% sawtimber.

Growth and yield predictions based on PMRC 1996 (Loblolly PMRC TR-1996-1 and Slash PMRC TR-1996-3) with FMRC Fastlob 3.0 Fertilizer response equations. Assumes mix of plantation / hardwood acreage and loblolly / slash species based on Rayonier portfolio averages.

Assumes non-timber income roughly offsets timber management costs for illustration purposes.

## **Valuing Publicly Traded Timber REITs**

#### **Timberlands**

- Sum-of-the-parts / NAV most common approach
  - Per-acre value inputs should take account of relative asset quality
- EBITDA multiples useful only if applying the *right* multiple to the *right* EBITDA
  - Appropriate timber multiple should be applied to timber segment EBITDA
- Important to assess rate of harvest relative to EBITDA for peer comparability

#### **Real Estate**

- Difficult to bifurcate HBU acreage and apply separate per-acre value
- Nominal HBU value lift is reflected in comparable sales values
- Evaluating premium to timberland value is critical
- Cap rate on recurring premium realization is a sensible valuation approach
- Not conducive to multiplebased valuation

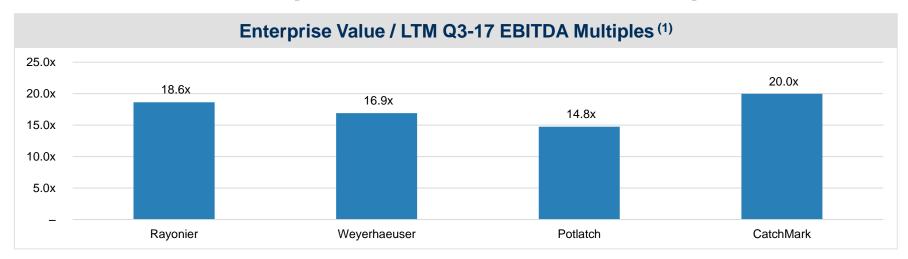

#### Manufacturing

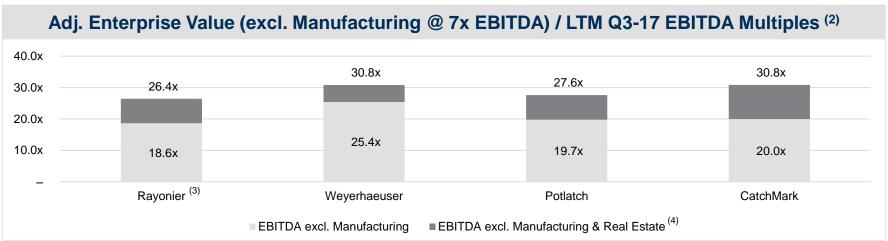

- EBITDA multiples and/or multiples of installed capacity are common valuation metrics
- Manufacturing typically trades at a *much* lower EBITDA multiple than timberlands (e.g., 6x-8x)
  - High volatility relative to timberlands
  - Taxable business
  - Significant ongoing capital requirements

Understanding Timber REIT valuations necessitates a distinct approach to each segment.

## Timber REIT Enterprise Value / EBITDA Multiples

Adjusting for manufacturing assets and real estate sales, the Timber REITs currently trade at a range of 26x to 31x "timber segments" EBITDA.

Enterprise Value based on market capitalization (shares outstanding x share price) plus net debt; share prices as of 11/7/17; shares outstanding and net debt as of 9/30/17. Adjusted Enterprise Value excludes Manufacturing assets at 7x LTM Q3-17 EBITDA. New Zealand land sales EBITDA of \$23.8 million in Q2 2017 reclassified to Real Estate for purposes of multiple calculation. Multiple of EBITDA excluding Manufacturing EBITDA and Real Estate EBITDA (i.e., Timber segments only).

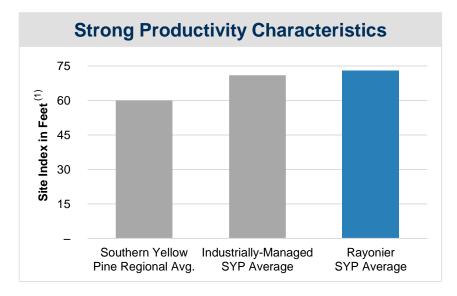

# **Timber Segments Overview**

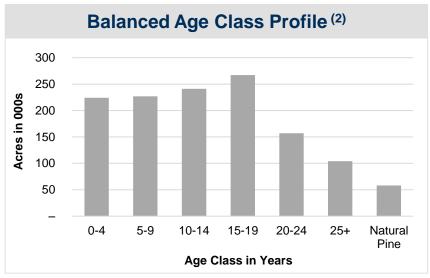

## Southern Timber – Portfolio Overview

#### **Highlights / Location**

- Acreage: 1.9 million acres
- Sustainable Yield: 5.9 6.3 million tons
- Planted / Plantable: 68%
- Average Site Index: 73 feet at age 25(1)
- 2016 EBITDA\*: \$93 million
- YTD Q3 2017 EBITDA\*: \$72 million
- Sustainable Forestry Initiative Certification

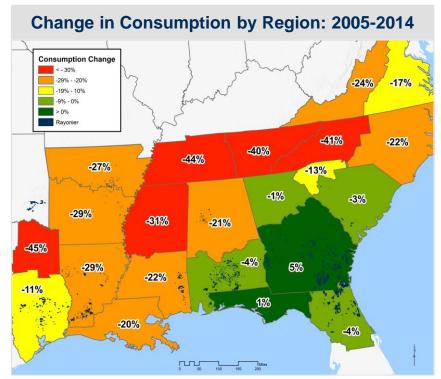

Non-GAAP measure (see Appendix for definitions and RYN reconciliations)

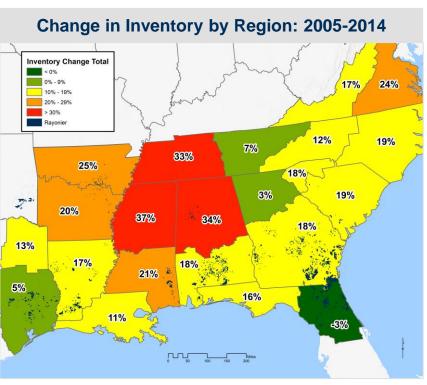

## Consumption & Inventory Changes Vary Across U.S. South

- Recession-induced demand declines have led to large drops in consumption for most areas
- Differences in consumption declines have caused regional market performance to vary
- Timberland portfolio performance will be influenced by geographic distribution

Source: USDA FIA Timber Product Output; University of Georgia, Wood Demand Report; Rayonier estimates.

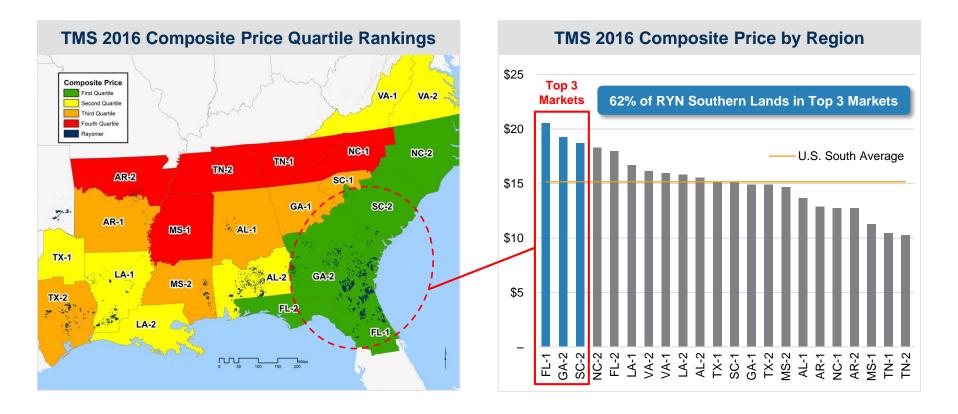

Source: USDA FIA data; Rayonier analysis.

## RYN Concentrated in Strongest U.S. South Markets

- Supply / demand dynamics are highly localized, as logs generally travel less than 100 miles
- Timber consumption vs. inventory growth remains much more tensioned in Coastal Atlantic markets

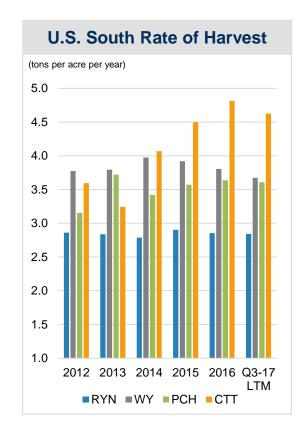

Approximately 62% of Rayonier's Southern timberlands are located in the top three markets (ranked by TimberMart-South composite stumpage pricing).

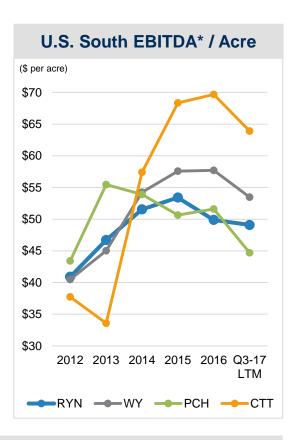

#### Rayonier Leads the Sector In U.S. South EBITDA\* / Ton

- EBITDA\* per ton best captures profitability per unit of sales
- EBITDA\* per acre can be misleading due to differential rates of harvest

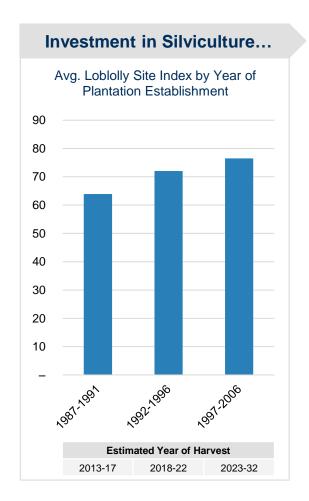

Rayonier's sector-leading EBITDA\* per Ton has increased by over 20% since 2012, while its rate of harvest has remained relatively stable.

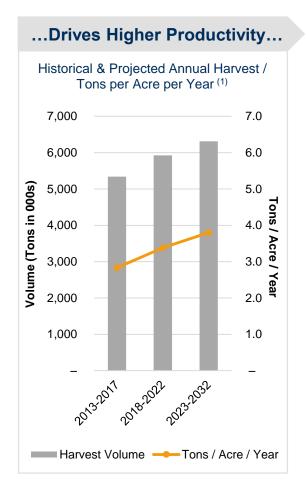

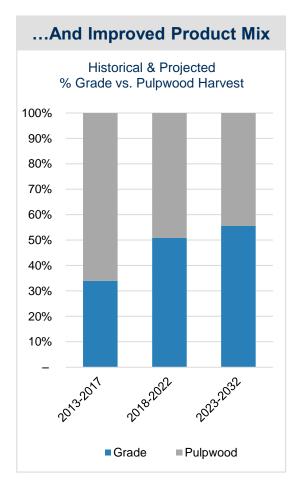

Source: WY figures pro forma for PCL combination. EBITDA, harvest volume and acreage data for all peers based on public filings. Per acre data calculated based on estimated average acres for each year (i.e., average of year-end and prior year-end acres), adjusted for major acquisitions/dispositions (i.e., pro-rated from date of transaction).

\* Non-GAAP measure or pro forma item (see Appendix for definitions and RYN reconciliations).

#### Productivity Gains + Mix Shift = Poised for Cash Flow Growth

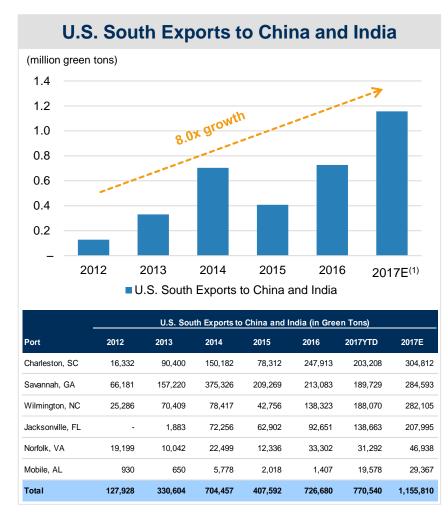

As higher site index stands reach maturity, Rayonier anticipates that its harvest volume will increase and its product mix will improve.

## **Growing U.S. South Export Demand**

Exports to China and India from the U.S. South have grown considerably, and Rayonier is well positioned to capitalize on this trend given its proximity to ports.

#### Pacific Northwest Timber – Portfolio Overview

#### **Highlights / Location**

Acreage: 378,000 acres

Sustainable Yield: 1.4 million tons

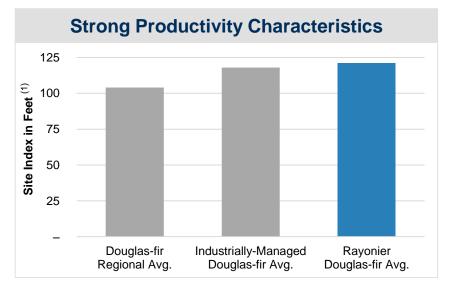

Planted / Plantable: 78%

Average Site Index: 109 feet at age 50<sup>(1)</sup>

- 2016 EBITDA\*: \$21 million

- YTD Q3 2017 EBITDA\*: \$23 million

Sustainable Forestry Initiative Certification

Source: U.S. Dept. of Agriculture, Society of American Foresters Journal of Forestry.

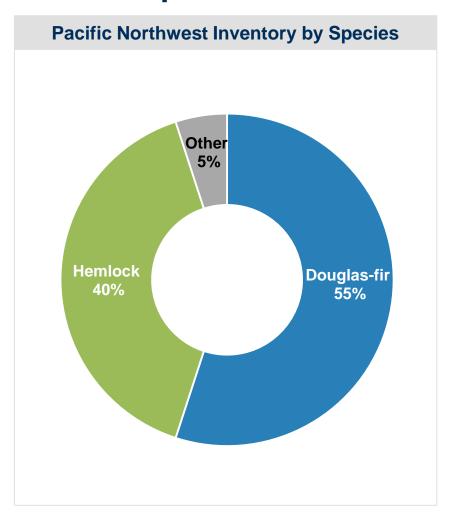

(1) Site index reflects the average height of the dominant and codominant trees at a base age of 50 (Pacific Northwest).

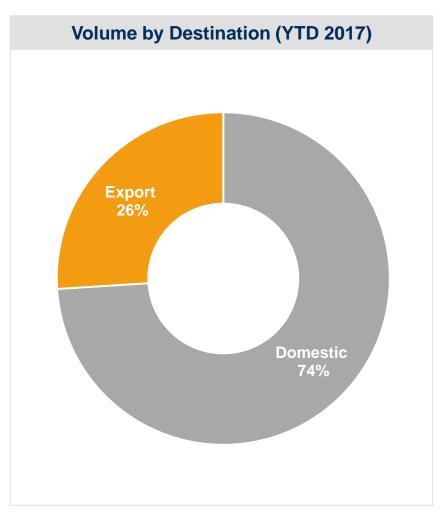

(2) Age class profile as of 9/30/16 per 2016 10-K.

Non-GAAP measure (see Appendix for definitions and RYN reconciliations).

#### **Diverse Species and End Markets**

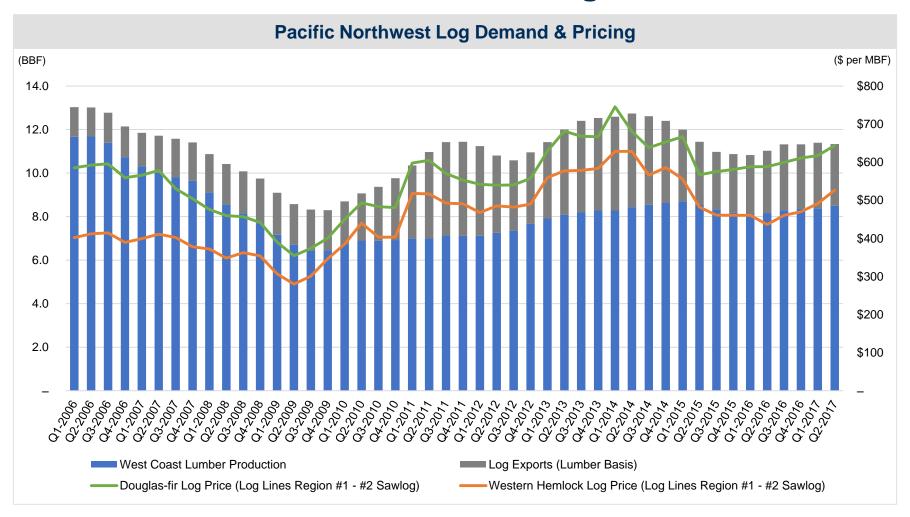

Rayonier's Pacific Northwest portfolio provides diversity of products and end-markets.

## Pacific Northwest Demand and Pricing Have Recovered

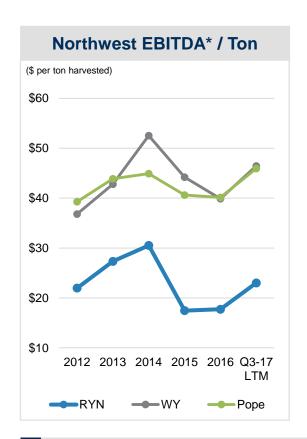

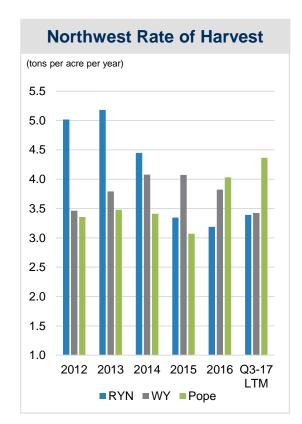

Pacific Northwest log prices have recovered to above pre-recession levels driven by increased export demand.

## Rayonier's Northwest EBITDA\* / Ton Is Improving

- Following November 2014 announcements, Rayonier reduced its rate of harvest in the Northwest
- EBITDA\* per ton and EBITDA\* per acre both declined as a result, but have improved since

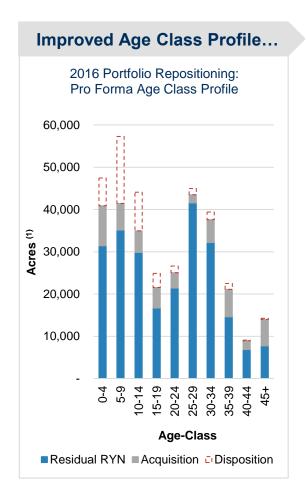

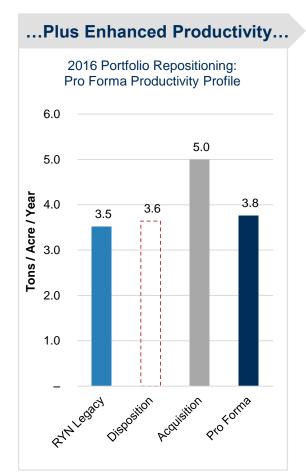

Rayonier's Northwest EBITDA\* per ton has been below the peer group due to its historical proportion of hemlock volume (vs. Doug-fir) and, more recently, due to its reduced rate of harvest.

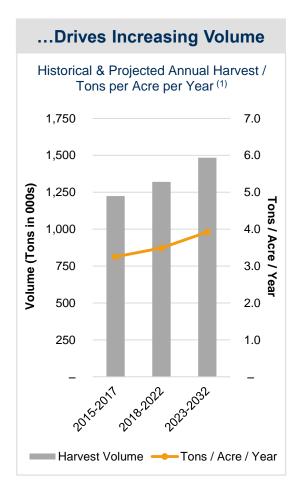

<sup>\*</sup> Non-GAAP measure or pro forma item (see Appendix for definitions and RYN reconciliations).

#### 2016 Portfolio Repositioning = Poised for Cash Flow Growth

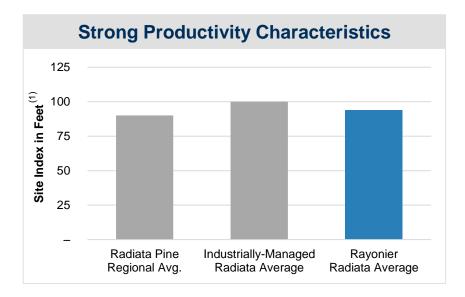

Rayonier's 2016 Pacific Northwest Portfolio Repositioning significantly improved both its near-term and long-term harvest outlook.

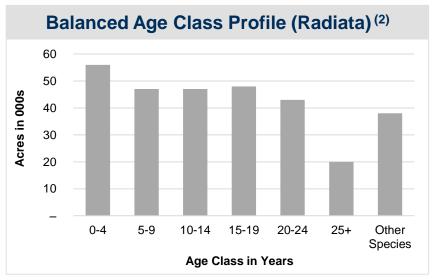

#### **New Zealand Timber – Portfolio Overview**

#### **Highlights / Location**

- Acreage: 429,000 acres
- Sustainable Yield: 2.3 million tons
- Planted / Plantable: 69%
- Average Site Index: 94 feet at age 20<sup>(1)</sup>
- 2016 EBITDA\*: \$58 million
- YTD Q3 2017 EBITDA\*: \$86 million
- Forest Stewardship Council Certification

NZ Ministry for Primary Industries, New Zealand Journal of Forestry.

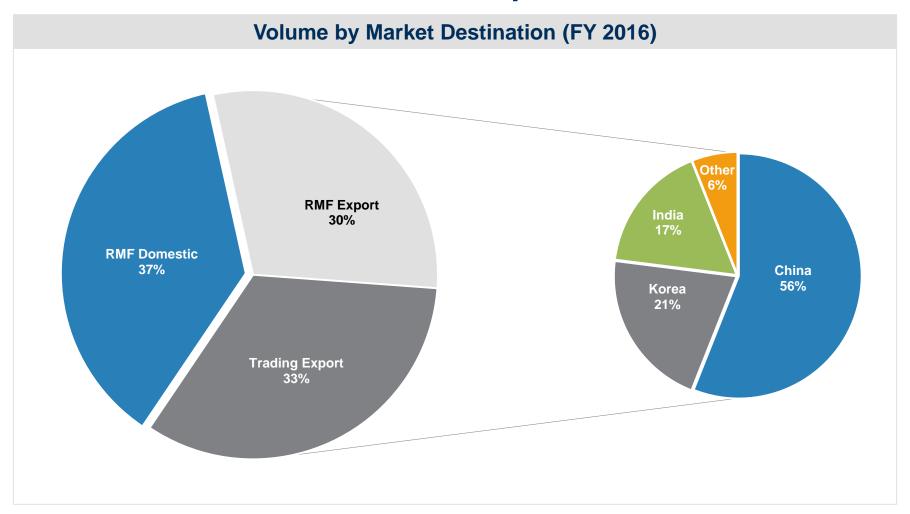

Site index reflects the average height of the dominant and codominant trees at a base age of 20 (New Zealand).

Age class profile as of 12/31/16 per 2016 10-K.

Non-GAAP measure (see Appendix for definitions and RYN reconciliations)

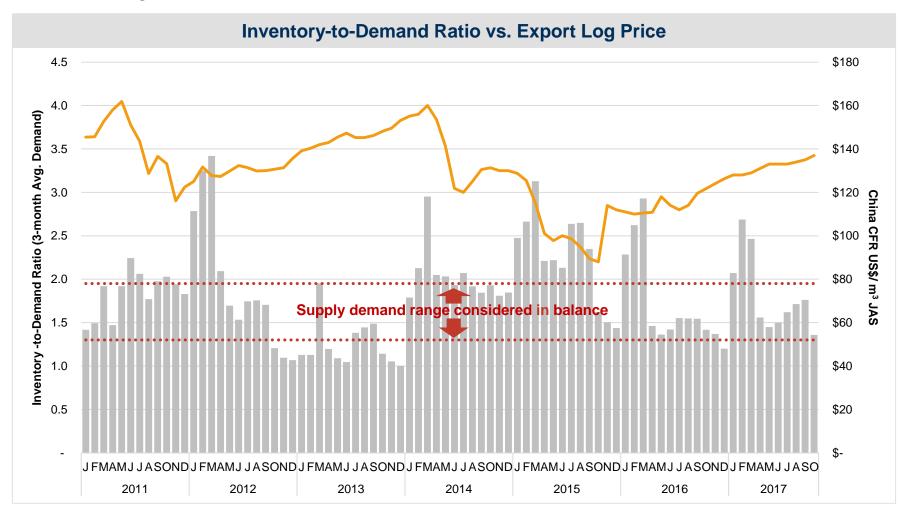

## **Diversified Mix of Domestic & Export Markets**

Over 60% of the New Zealand segment's volume (including Trading volume) is sold into export markets, with China being the largest source of demand.

## **Inventory Levels Drive Near-Term Price Fluctuations**

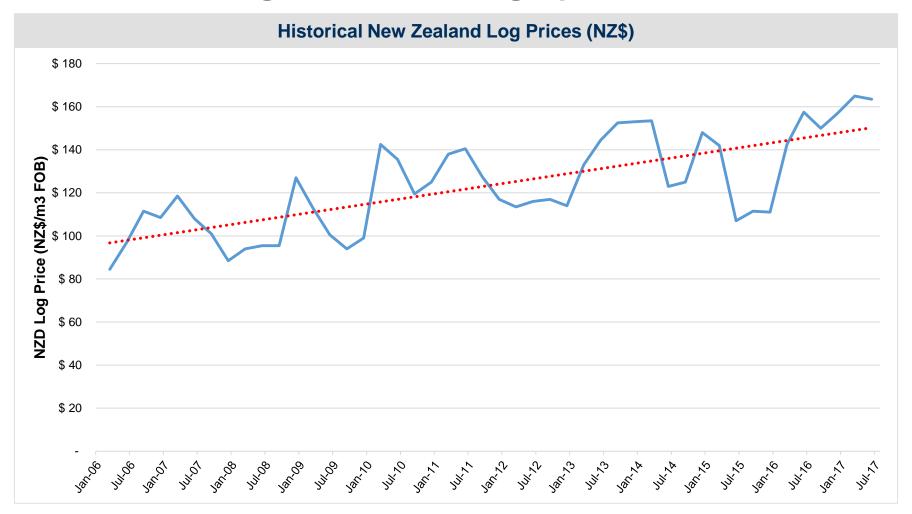

Export supply / demand is generally considered in balance when the ratio of port inventory to average monthly demand is between 1.3 and 2.0 times. Inventory typically spikes around the Chinese New Year.

ource: Rayonier estimates.

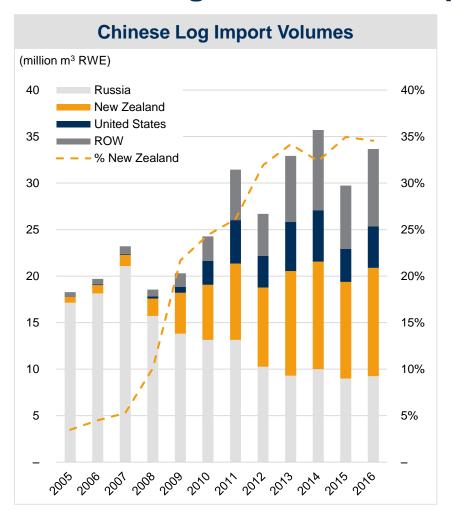

## **New Zealand Log Prices Trending Upward**

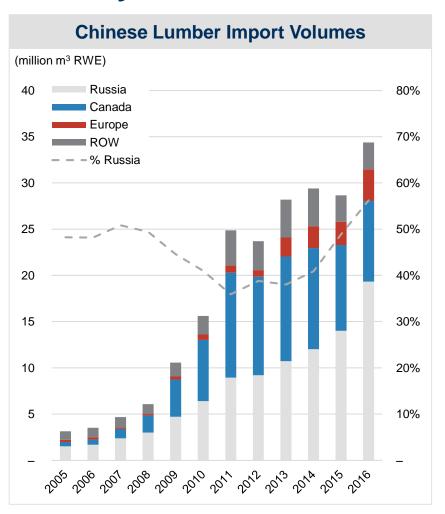

Over the last 10 years, New Zealand log prices have been trending upward based primarily on growing export market demand.

## Chinese Log and Lumber Imports Rely on NZ and Russia

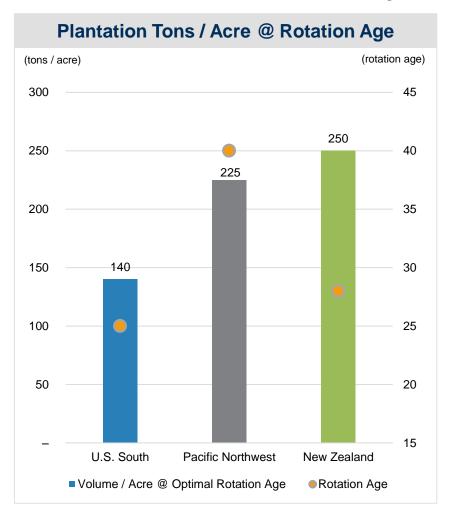

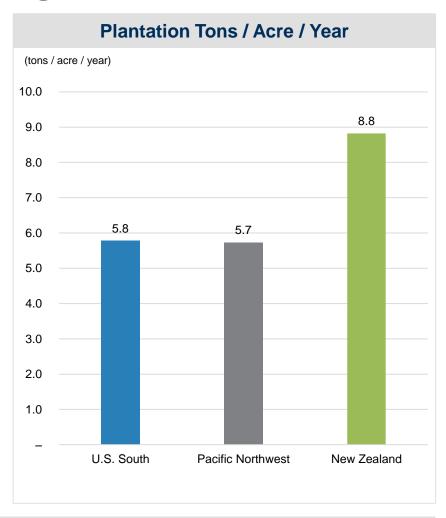

New Zealand has captured a significant share of the growth in China's log import volume.

## New Zealand Productivity Strong Relative to U.S.

In addition to providing market diversification, New Zealand offers superior softwood plantation productivity relative to the U.S.

## **Real Estate / HBU Strategy**

## Real Estate strategy: optimize value & create optionality

#### **Timberlands**

#### Strategic sales of timberland

- Opportunistic-only for capital allocation
- Upgrade portfolio
- Excluded from Adj.
   EBITDA and proforma financials

#### **Timberland value**

Opportunistic

#### Sale of non-strategic and timberland assets

- Timberland: capture a financial premium
- Non-Strategic: monetize and repurpose "deadcapital"

#### **Timberland premium**

Reduce reliance

#### **Real Estate**

Rural Places + Properties

#### Sale of rural properties

- Stable and recurring source of cash flows
- Build a pipeline of enhanced rural properties in higher potential markets

#### **HBU** premium + ROI

Grow moderately

#### Unimproved Development

## Sale of properties with development rights

- Invest in securing development rights
- Build a pipeline of entitled properties in higher potential markets

#### **HBU premium + ROI**

Grow in select markets

#### Sale of developed land parcels

- Invest in infrastructure and amenities
- Enhance value and create optionality of adjacent RYN properties

# HBU premium + ROI + optionality

Grow in very select markets

Land Resources

Sale of access to use properties / extract resources

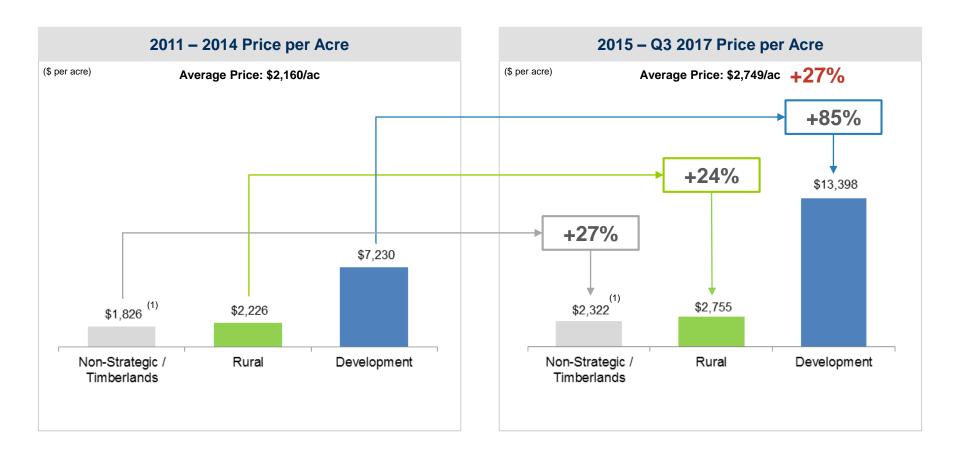

- Maximize and grow annual gross margin/ac
- Build diverse portfolio of cash flows
- Develop new business growth

Annual gross margin per acre

Grow moderately

## Making progress and just getting started: price growth

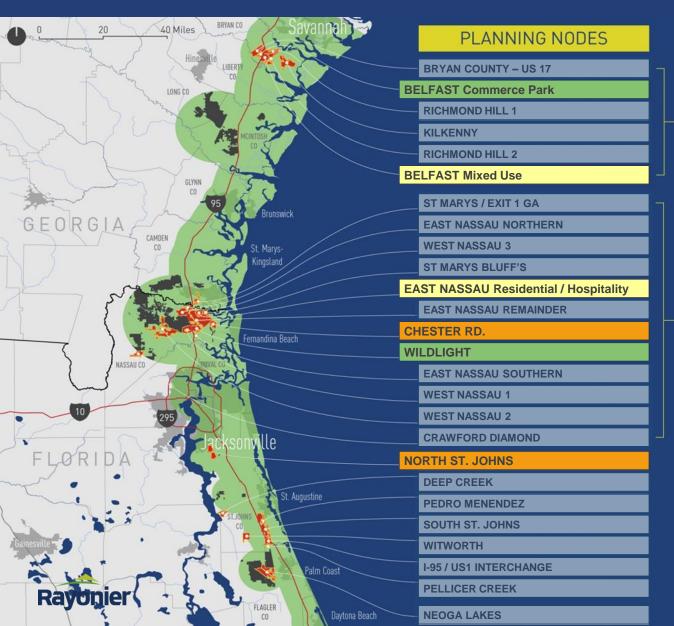

Rayonier has realized stronger pricing on real estate than its timber REIT peers. Excluding Large Dispositions, Rayonier's real estate sales are heavily focused on HBU properties.

#### I-95 Coastal Corridor: active portfolio management

#### **Overview of Wildlight Community Development**

# WILDLIGHT

FLORIDA LOWCOUNTRY LIVING

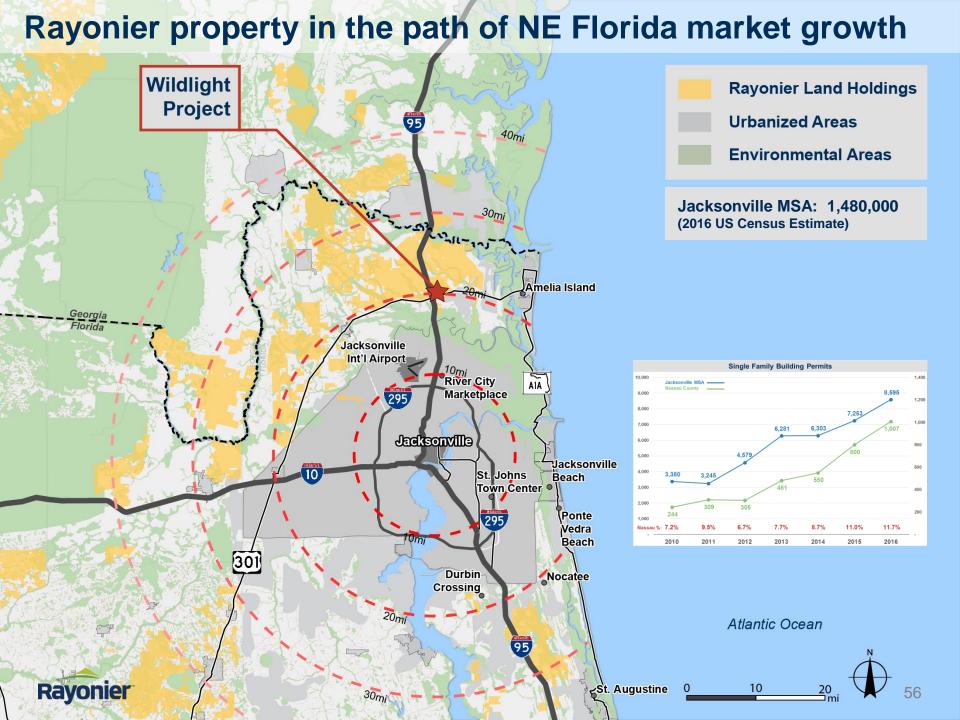

- 261 net-acre master planned community north of Jacksonville, Florida
- Well positioned in a growing sub-market
- Initial infrastructure nearing completion
- Rayonier owns ~25,000 acres in a 5-mile radius
- Land use entitlements in place to support future growth
- Catalytic projects complete or underway

Our strategy is to target Northeast Florida market demand and catalyze value across our significant land holdings over time.

## Significant catalytic projects now complete or underway

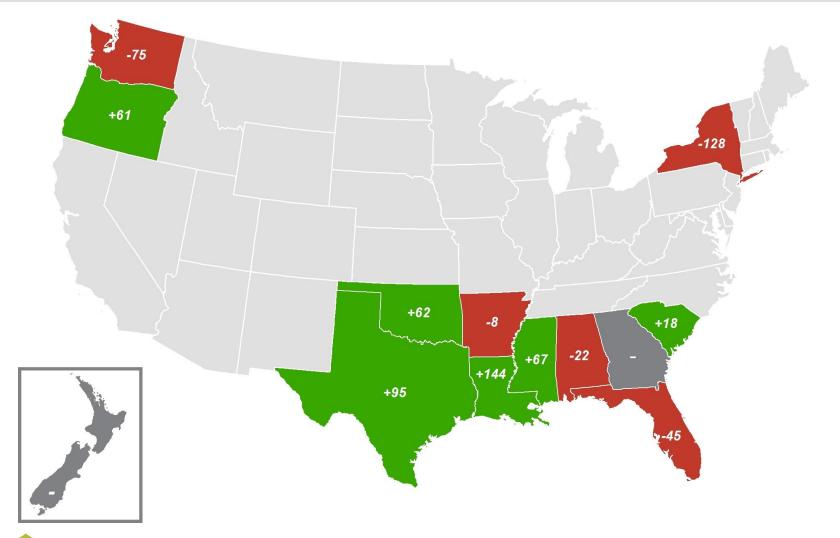

# **Portfolio Management Strategy**

## ~\$1.6 Billion Acquired and ~\$800 Million Sold Since 2011

#### **Change in Acres by Location Since January 2011 (000 Acres)**

#### Focus On High-Quality Softwood Properties in Strong Markets

#### LOCATION

- Timber end markets with favorable supply / demand tension
- Well-developed infrastructure, access to ports & other transportation hubs

#### **ASSET QUALITY**

- Softwood investments in regions with strong biological growth
- Complementary age-class distribution that improves sustainable harvest

#### **OPTIONALITY**

- Fee simple ownership, preferably without wood supply agreements
- Ability to market timber through delivered log or stumpage sales

#### **VALUE CREATION**

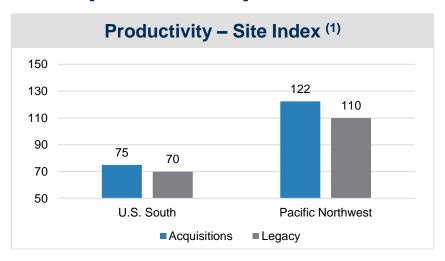

- Ability to enhance returns through intensive silviculture and genetics
- Properties with HBU and non-timber income upside potential

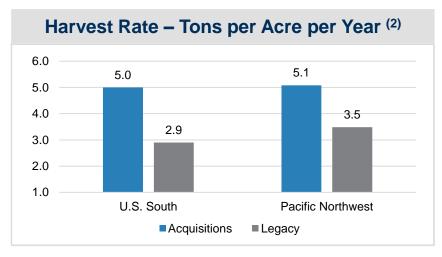

# FINANCIAL PROFILE

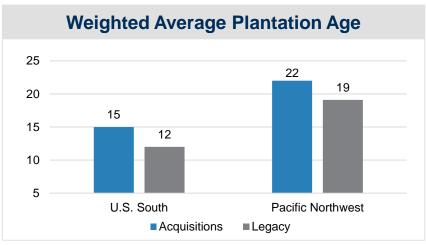

- Accretive to Cash Available for Distribution (CAD)\*
- Focus on acquisitions with returns in excess of our cost of capital

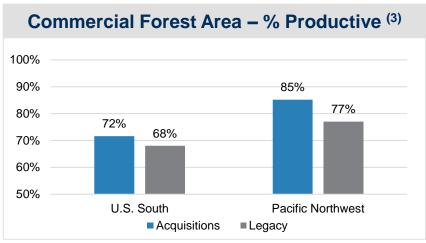

## **Disciplined Acquisition Process = Improved Portfolio**

Rayonier seeks to acquire properties that improve quality of portfolio and produce strong recurring cash flow from sustainable harvest.

Comparison charts reflect data for U.S. legacy per 2014 10-K and acquisitions from 2014 to September 30, 2017. Site index base age = 25 years for U.S. South and 50 years for Pacific Northwest.

Harvest rate for RYN Legacy assumes sustainable yield of 5.4 to 5.7 million tons for Southern Timber and 1.3 million tons for Pacific Northwest Timber (per 2014 10-K). Harvest rate for acquisitions based on projected 10-year harvest.

Includes land classified as natural plantable for Southern Timber segmen

# **Appendix**

#### **Definitions of Non-GAAP Measures and Pro Forma Items**

Adjusted EBITDA is defined as earnings before interest, taxes, depreciation, depletion, amortization, the non-cash cost of land and improved development, costs related to shareholder litigation, the gain on foreign currency derivatives, Large Dispositions, internal review and restatement costs, costs related to spin-off of the Performance Fibers business, the gain related to the consolidation of the New Zealand JV and discontinued operations. Adjusted EBITDA is a non-GAAP measure that management uses to make strategic decisions about the business and that investors can use to evaluate the operational performance of the assets under management. It removes the impact of specific items that management believes do not directly reflect the core business operations on an ongoing basis.

**EBITDA** by segment is calculated as operating income before depreciation, depletion, amortization and specific items that are not indicative of ongoing operating results. EBITDA by segment for Rayonier is equal to Adjusted EBITDA.

Last twelve months (LTM) Adjusted EBITDA is a non-GAAP financial measure that Rayonier believes provides investors with useful information to evaluate the Company's ability to service its debt. For purposes of this calculation LTM Adjusted EBITDA is used as an indicator of the Company's performance over the most recent twelve months and debt net of cash is presented as an indicator of Rayonier's current leverage.

Cash Available for Distribution (CAD) is defined as cash provided by operating activities adjusted for capital spending (excluding timberland acquisitions and spending on the Rayonier office building) and working capital and other balance sheet changes. CAD is a non-GAAP measure that management uses to measure cash generated during a period that is available for dividend distribution, repurchase of the Company's common shares, debt reduction and strategic acquisitions. CAD is not necessarily indicative of the CAD that may be generated in future periods.

Costs related to shareholder litigation is defined as expenses incurred as a result of the securities litigation, the shareholder derivative demands and the Securities and Exchange Commission investigation. See Note 10 — Contingencies of Item 8 — Financial Statements and Supplementary Data in the Company's most recent Annual Report on Form 10-K. In addition, these costs include the costs associated with the Company's response to a subpoena it received from the SEC in November 2014. In July 2016, the Division of Enforcement of the SEC notified the Company that it had concluded its investigation into the Company.

**Gain on foreign currency derivatives** is the gain resulting from the foreign exchange derivatives the Company used to mitigate the risk of fluctuations in foreign exchange rates while awaiting the capital contribution to the New Zealand JV.

**Large Dispositions** are defined as transactions involving the sale of timberland that exceed \$20 million in size and do not have a demonstrable premium relative to timberland value.

## **Reconciliation of LTM Adjusted EBITDA**

(\$ in millions)	Q4 2016	Q1 2017	Q2 2017	Q3 2017	Total
