

Investor Presentation

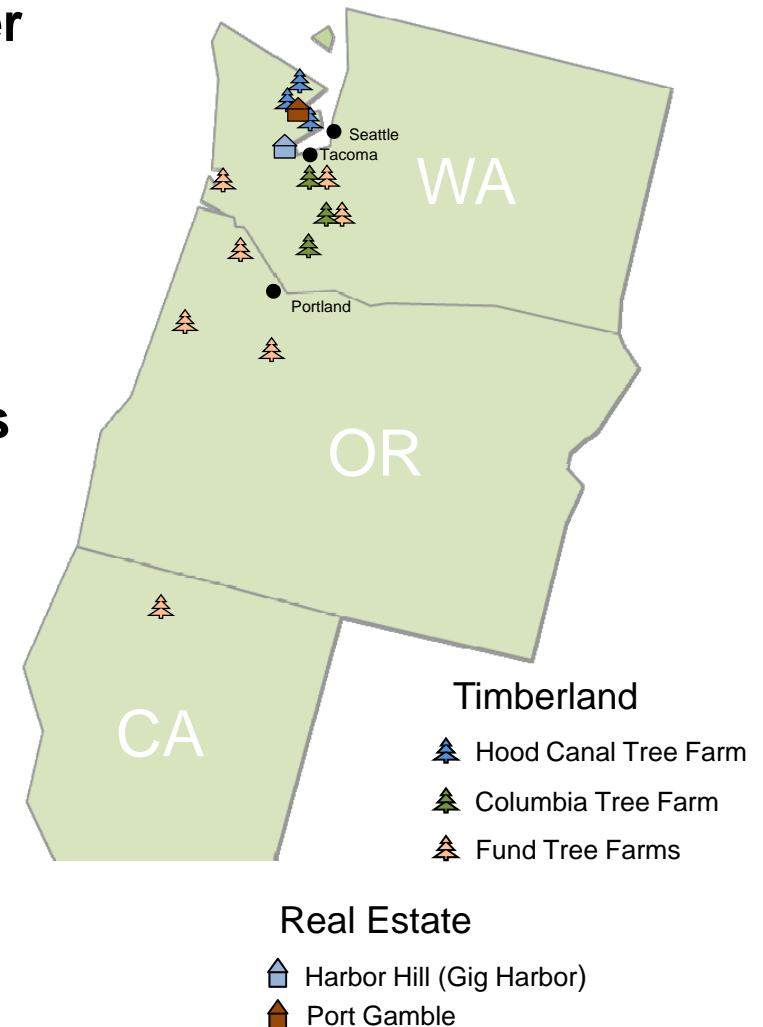

September 28, 2017

Safe Harbor Statement

This presentation contains forward-looking statements. These forward-looking statements are subject to a number of risks and should not be relied upon as predictions of future events or promises of a given course of action. Some of the forward-looking statements include statements about our future distribution yield and the related effects of federal tax law, our sustainable harvest levels, our future private equity fund activities, our estimates for future remediation costs and environmental liabilities at Port Gamble, transportation and other factors that affect our real estate values, and our expectations for completing real estate sales. A number of important factors could cause actual results to differ materially from those described in the forward-looking statements. Some of these factors include environmental issues affecting our properties and our ability to anticipate the actions of regulators, environmental groups, and other parties that might affect our remediation efforts; changes in forestry, land use, environmental, and other governmental regulations; risk of loss from insect infestations or tree diseases; changes in economic conditions and competition in our domestic and export markets; and other factors described from time to time in our filings with the Securities and Exchange Commission. In particular, readers should consider those risk factors that are detailed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 and our Form 10-Q filed for the period ended June 30, 2017. Forward-looking statements are not guarantees of performance, and speak only as of the date made, and neither Pope Resources nor its management undertakes any obligation to update or revise any forward-looking statements.

Investment Rationale

- **Pure play Pacific Northwest (PNW) timber company**
 - Highest value North American timberland
 - Log export access provides market diversification
- **Units offer opportunity to own real assets that generate attractive distribution yield (currently at \$2.80 annual rate)**
- **Master Limited Partnership (MLP) structure generates favorable after-tax returns**

Pope Resources: Unique Blend of PNW Timber and Land Assets

Segments	Fee Timber	Timberland Investment Management	Real Estate
Strategy	<ul style="list-style-type: none"> Sustainably manage Partnership and Fund timberlands in PNW Maximize long-term value Acquire small tracts to replace RE sales and optimize portfolio 	<ul style="list-style-type: none"> Leverage expertise to generate fee revenue and improve economies of scale Co-invest in funds to grow and diversify Partnership's timberland holdings in region 	<ul style="list-style-type: none"> Realize value of asset portfolio while minimizing capital risk to Partnership Monetize conservation values on Partnership timberlands as appropriate
Portfolio (at 6/30/17)	<ul style="list-style-type: none"> 120,000 acres in Partnership 88,000 acres owned by Funds 	<ul style="list-style-type: none"> 3 private equity timber funds \$357 MM under management \$388 MM of committed capital 	<ul style="list-style-type: none"> 2,200 acres of development, highest and best use (HBU) & commercial properties in West Puget Sound, which includes over 1,200 entitled lots Total book value \$37.8 MM
2016 Revenue (internal)	\$57.5 MM	\$3.3 MM [#]	\$23.4 MM
2016 Adjusted EBITDDA* (internal)	\$25.6 MM	\$0.4 MM	\$4.7 MM

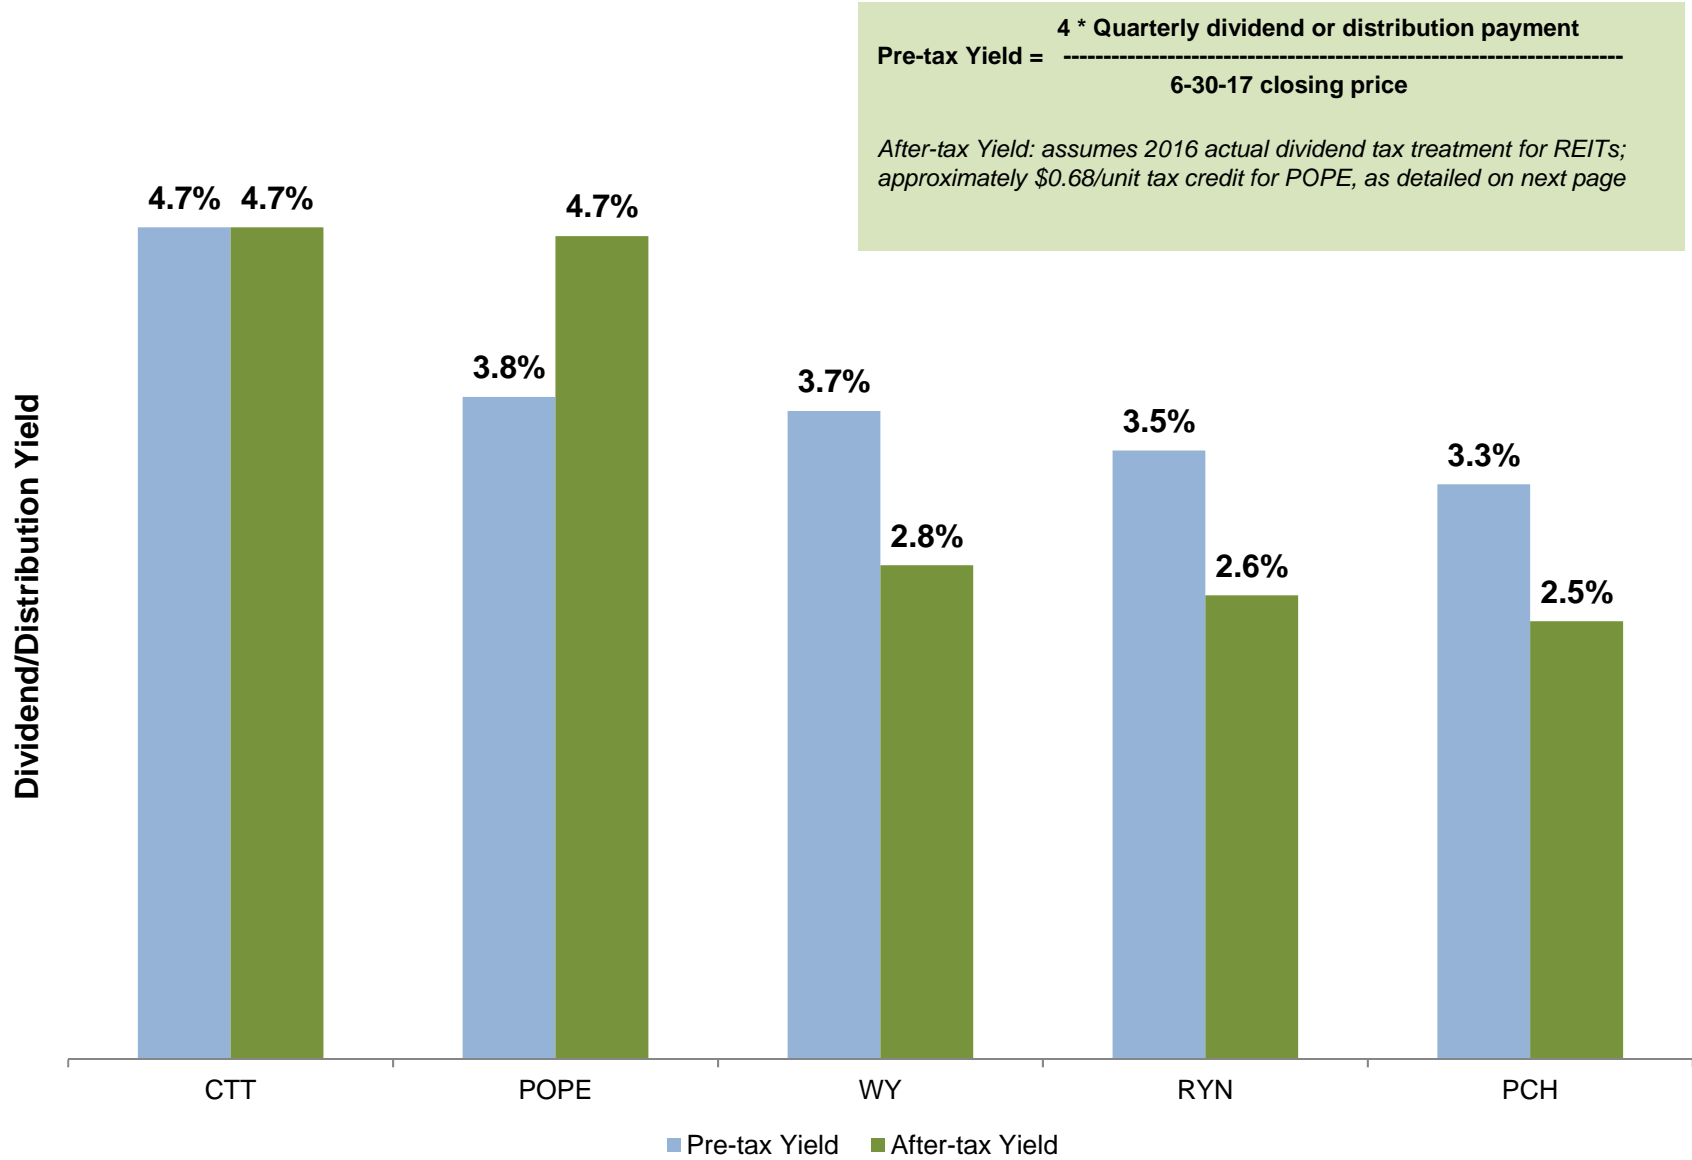

[#] Revenue eliminated in consolidated earnings

^{*} See Appendix A for definition reconciliation of non-GAAP Adjusted EBITDDA

Unit Distributions Have Increased Since the Global Financial Crisis (GFC)

Attractive After-Tax Yields

MLP Structure: Favorable Tax Treatment

- Taxable income and losses pass through MLP at different tax rates to holders of POPE units
- Sale of timber is treated as capital gain, taxed at lower capital gains tax rate
- Remainder of business activity generally results in an ordinary loss, taxed at marginal ordinary income rate, generating a tax benefit
- A REIT does not enjoy segregation of the capital gain and ordinary loss

	2016 Tax Year	Tax Impact to Individual of POPE Units		Proforma Tax Impact as a REIT		MLP Tax Savings Versus a REIT
		Top Tax Rate	Tax (Cost)/Benefit	Top Tax Rate	Tax (Cost)/Benefit ³	
Pope Resources K-1 (per unit) ¹						
Ordinary loss	(\$5.07)	39.6%	\$2.01			
Capital gain-timber	4.28	23.8%	(1.02)			
Capital gain-land	0.01	23.8%	(0.00)			
Interest income	-	39.6%	-			
Total	(\$0.78)		\$0.99			
Suspended loss ²	\$0.78	39.6%	(0.31)			
Total	\$0.00		\$0.68	23.8%	\$0.00	\$0.68

¹ Income components provided above are at an aggregate level. Each unitholder's allocation of income will be different depending on the date and price at which POPE units were purchased.

² Unitholders can only take losses up to the sum of gains in current year. Suspended losses may carry over to future years.

³ A dividend paid by a REIT during a year when a loss was incurred is treated as non-taxable return of capital.

Fee Timber

Fee Timber Strategy and Market Dynamics

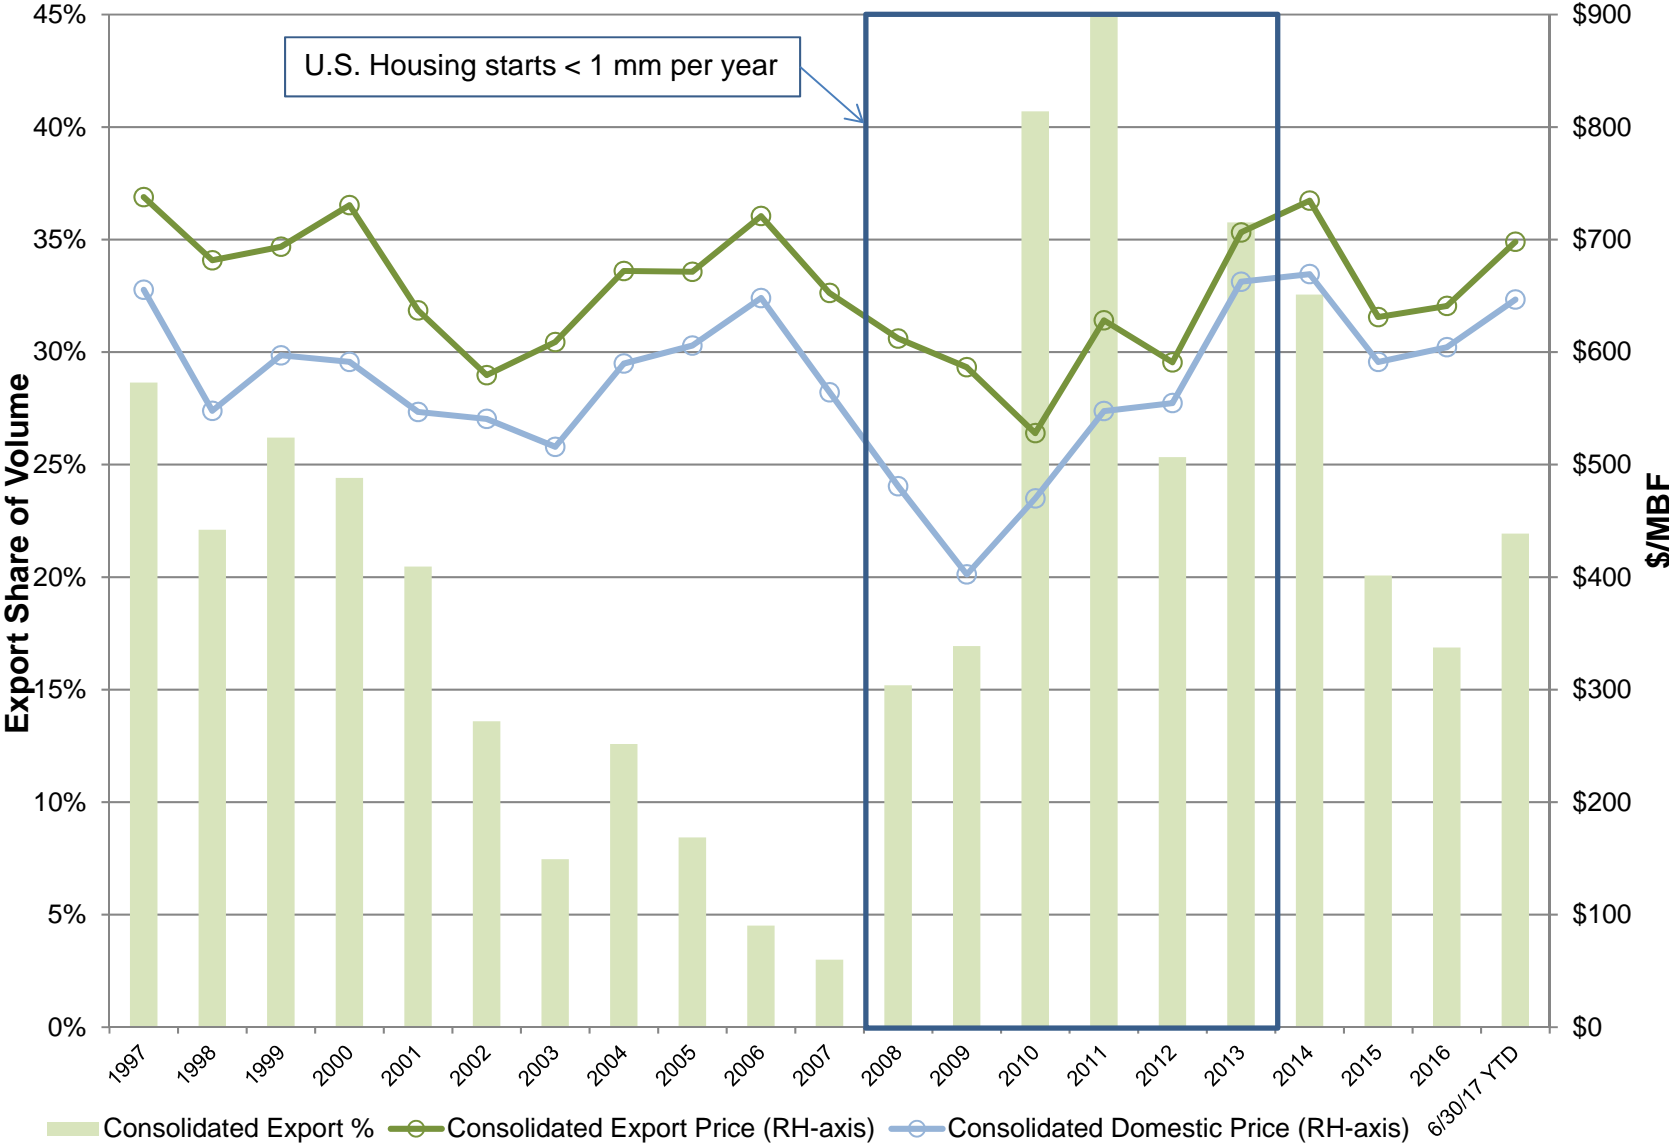

Strategies

- Actively manage for long-term value maximization 120,000 acres of Partnership timberland with a sustainable harvest of 52 million board feet (MMBF)
- Maximize total return on 88,000 acres of Fund timberland
- Employ value-adding silvicultural practices
- Opportunistically acquire small tracts to replace land that has been sold as development property and optimize portfolio

Log Market Dynamics

- PNW log markets enjoy access to competitive domestic and export markets
- Domestic market continues measured improvement
 - Stronger domestic log demand with growing U.S. housing starts
 - New SPI mill in Shelton, WA adding pressure to log prices
- Export market diversification was key to log market recovery during the GFC
 - Export market remains important source of demand
 - Canadian timber supply is contracting due to Mountain Pine Beetle infestation

Export Sales Provide Market Diversification

Source: US Census Bureau, POPE

Unique Attributes of Timber Asset Class

Biological growth

- Continues throughout the business cycle
- Accurately projecting forest growth over an entire rotation is prerequisite to successful timberland investing
- Level of timberland management activity will be one of the factors that must be considered when projecting forest growth

Timber optionality

- Ability to allow timber to continue growing on-the-stump past the planned rotation age during soft log markets distinguishes timber from other inventoried commodity products
- Growth will help pay the cost of capital during the deferral period by increasing both the volume and the quality of timber at harvest (more sawlogs, less chip-n-saw and pulp)

Small Tracts and Carbon River

- **Small tracts acquisition program launched in 2014**
 - Goal is to grow Partnership's timberland footprint through offsetting HBU sales of past years
 - To date, 5,718 acres have been acquired for \$19.4 MM in 15 separate transactions; \$3,385/acre
- **July 2016 acquisition of Carbon River tree farm**
 - 7,324 acres for \$31.9 MM; 100% debt-financed
 - 2.79% average net interest rate
 - 8% increase in annual sustainable harvest volume to 52 MMBF
 - Merchantable timber makes transaction immediately cash accretive

Timberland Investment Management

Private Equity (PE) Timber Business

Source of cash flow

- Fund II & III current portfolios generate \$2.1 MM of annual asset management fee (AMF) revenue on \$357.0 MM of AUM; \$1.9 MM of AMF from third-party investors, \$0.2 MM from Partnership
- These fees, combined with distributions from co-investments in funds, represent a meaningful source of POPE's distributable cash

Economies of scale

- Co-investment by POPE in the funds enhances diversification of the Partnership's timberland holdings within the PNW
- Increased acres and harvest volume provide additional scale in log markets
- Active participation in timberland markets throughout the business cycle improves management understanding of timberland values
- Enables the Partnership to attract better talent to the management team

PE Timber Business Supports Partnership Distributions

ORM Timber Fund IV

- **Committed capital of \$388 MM versus \$180 MM in Fund III**
 - Includes Pope Resources' commitment of \$58 MM
 - Drawdown period of 36 to 60 months
 - PNW target region includes Washington, Oregon, Idaho, Montana, and the mixed-conifer region of northern California
- **Fund term of 15 years versus 10 years in prior funds**
- **Timberland investment dynamics today appear to be shifting toward buyer**
 - Apparent reduction in capital committed to asset class
 - Bottoming out of discount rates
 - Investments made prior to the GFC are coming on the market

A stylized map of a residential development. The map features a central pond in a light blue color, surrounded by a dark green area. A network of winding roads, shown in a light green color, connects various lots. The lots are outlined in black and some are filled with a dark green color, suggesting they are occupied or under construction. The overall background is a light green color.

Real Estate

Land Development Expertise

Our Focus

- Enhancing value through entitling and developing 2,200-acre land and development portfolio for sale to residential or commercial builders
 - Urban infill and master plan communities
 - Conservation land and easement sales: \$25.8 MM in net proceeds from 2013-16
 - Rural land sales (5 - 40-acre parcels) for primary and secondary home market

Underlying Fundamentals

- Seattle has been and will continue to be one of the nation's leading job and housing markets
- Portland is experiencing similar growth that will lead to an increase in rural and recreational properties for our southwest Washington holdings
- Asian investment is on the rise, further depleting traditional housing supply
- Washington and Oregon both have strict growth laws and strong environmental lobbies that have created a shortage of buildable lots

Land Development Expertise

Our Execution

- We are: A “big fish in a small pond” in our real estate markets
- We create: A healthy political environment that promotes acceptance and approval through “grass roots” organizing (bottom-up political structure)
- Target Results
 - We gain approval for relatively large projects in a growth-constrained environment
 - Low incidence of appeals and trips to court
 - Strong reputation leads to more opportunity

Gig Harbor Project

Residential

- Expect to sell 93 single-family lots in 2017
- Expect to sell remaining 65 lots in 2018

Commercial

- Working with grocer anchor and retail developer for 18-acre retail village site (possible sale in 2018)

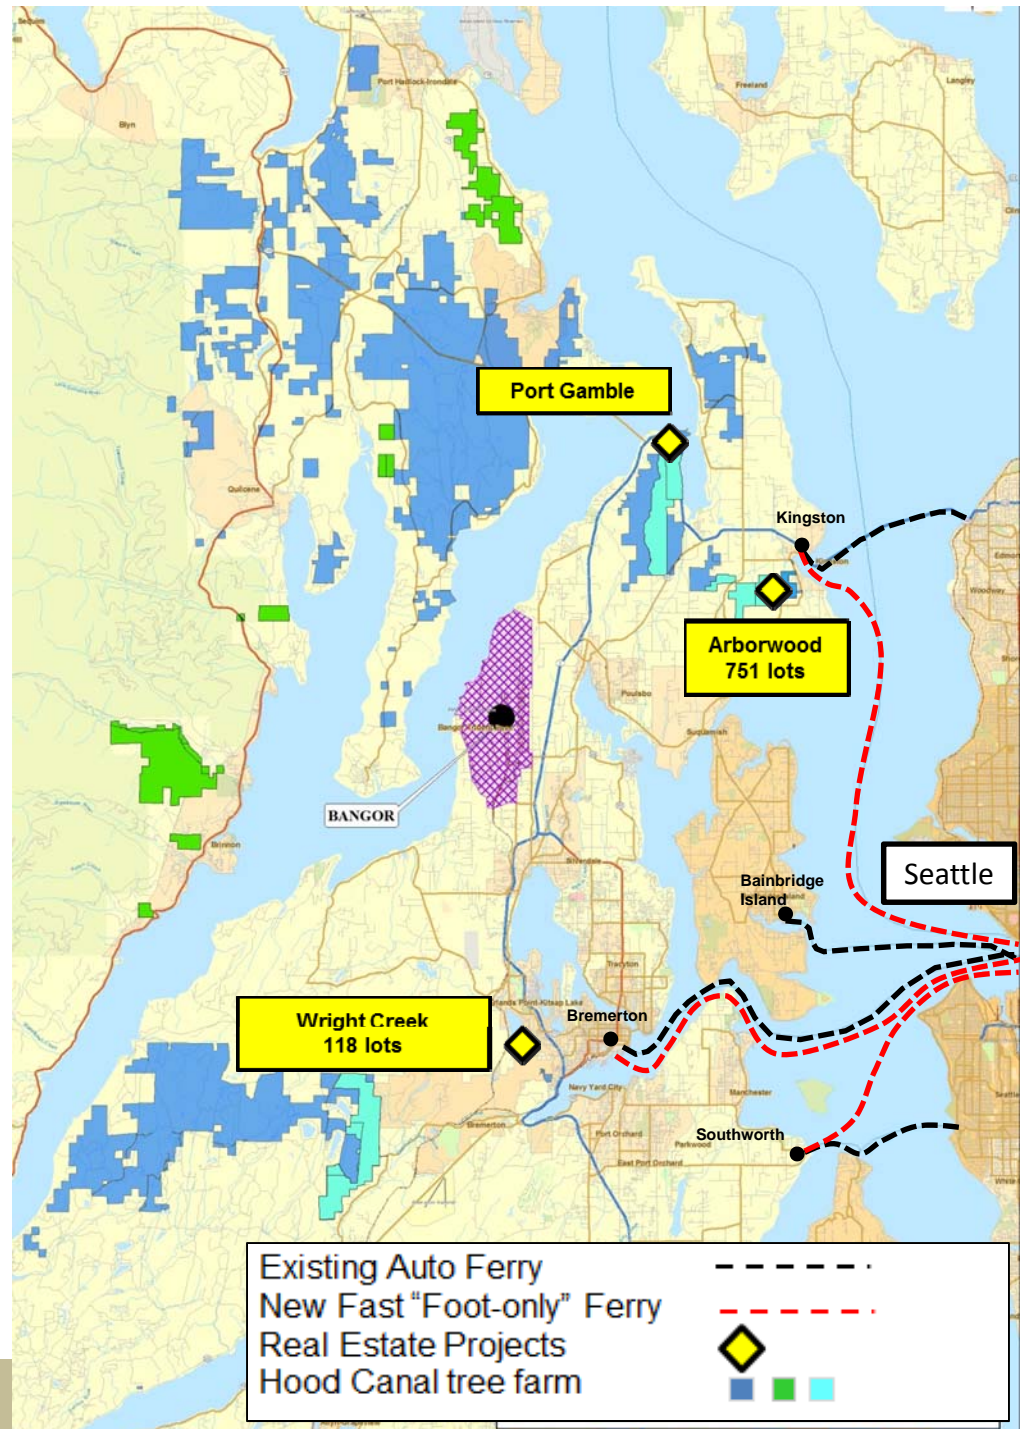

Business Park

- Interest from YMCA, City of Gig Harbor for remaining 11 acres

New Ferry Connections

- 2016 ballot initiative creates three new 30-minute commuter runs
- Bremerton route is running; Kingston expected to start in 2018; Southworth in 2020
- Significant impact to three projects, putting over 800 lots within a 30-minute ferry ride from downtown Seattle
- Increases development potential of Partnership timberland holdings in western Puget Sound

Port Gamble

Redevelopment

- Kitsap County Public Utilities District obtained state grant and extended 3-mile water main in 2015
- Completed new wastewater treatment plant in 2017, including removal of existing outfall
- Will submit application to construct up to 200+ new homes, a hotel, and additional commercial buildings by end of 2017

Environmental Remediation Update

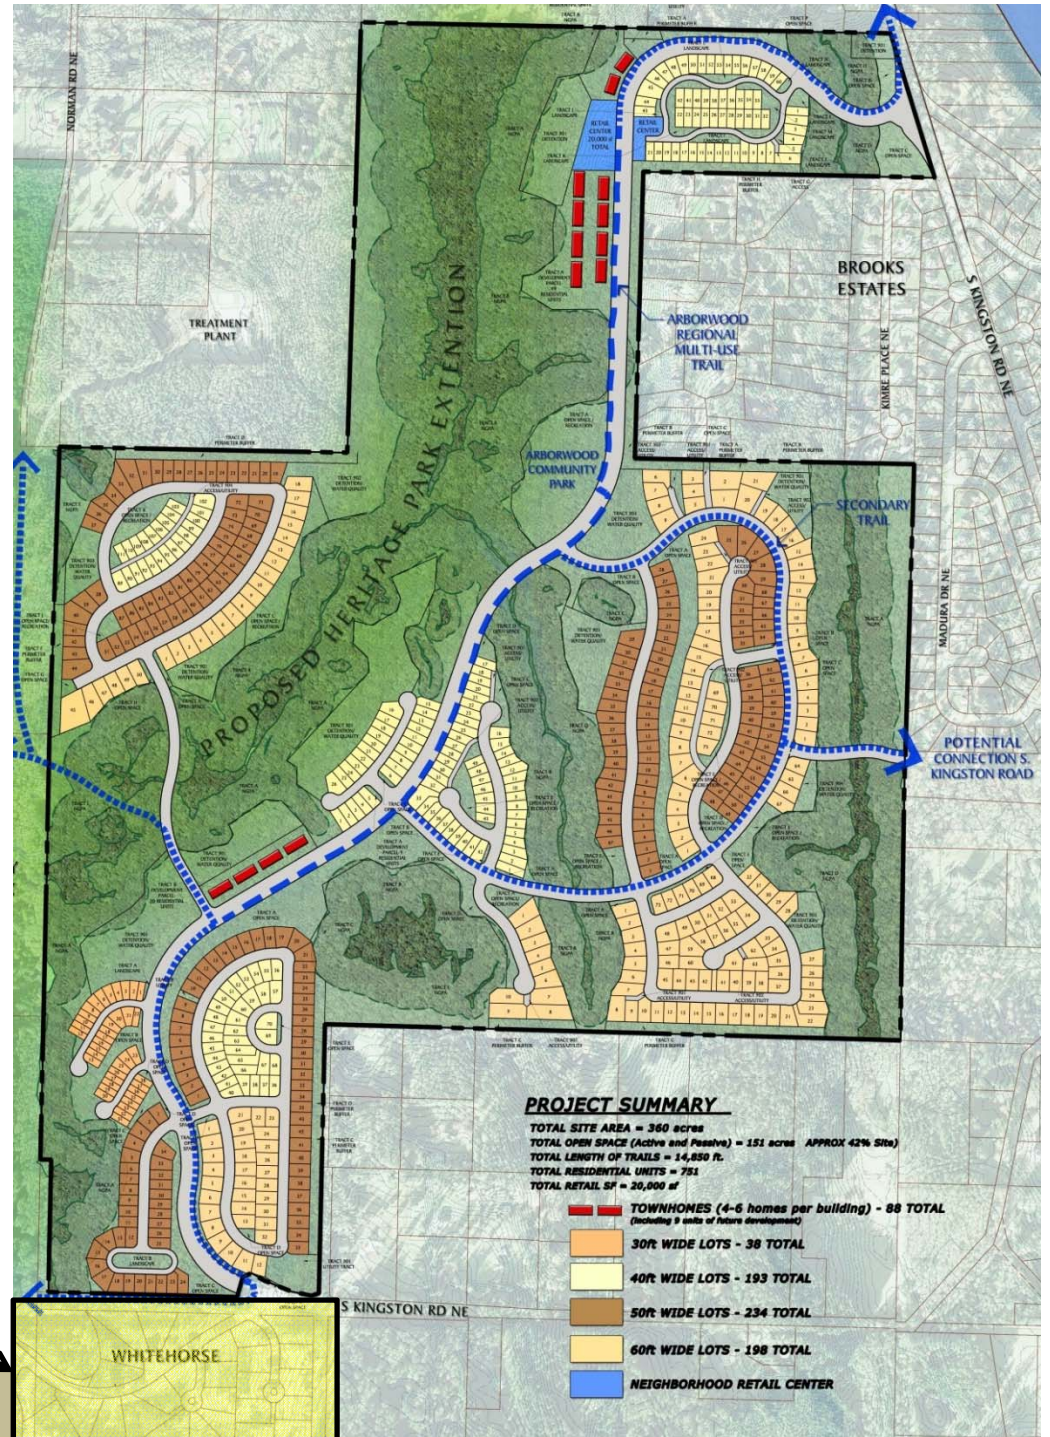

- Spent \$7.7 MM in 2016 and completed all in-water work in January 2017
- Anticipate spending \$8.4 MM in 2017, the majority of which includes the completed project of transporting dredge materials to permanent landfill
- Begin long-term monitoring in 2018

Arborwood

- Approved in 2006 (undergoing revision now)
- 751 residential units
- Trail connection to Port Gamble
- 1 – 2 miles from Kingston ferry

Whitehorse
Golf Course
Community

Bainbridge Landing

- Joint venture project consists of 107 apartments and 25 townhomes
- Walking distance to Bainbridge Island ferry, which takes 35 minutes to reach downtown Seattle
- Projected capitalization
 - \$1.5 MM: POPE equity
 - \$6.0 MM: 3rd party equity raised by POPE
 - \$7.5 MM: JV Partner equity
 - \$26.5 MM: construction loan
- JV partner providing debt guarantee

Real Estate Land Sale Net Proceeds

A close-up photograph of a tree trunk cross-section, showing concentric growth rings in shades of orange and brown. The rings are dense and clearly defined, radiating from a central point.

Takeaways

- 100% geographic focus on the PNW, the highest value timberland and **most diverse log markets** in North America
- **Units offer opportunity to own real assets that generate** attractive distribution yield
- MLP structure **generates favorable after-tax returns for unitholders**

* Cash Available for Distribution = Cash flow from operations, less maintenance capex (excludes timberland and building acquisitions and development capex already reflected in cash from op's), plus financed debt extinguishment costs.

APPENDIX B

ADDITIONAL MATERIALS

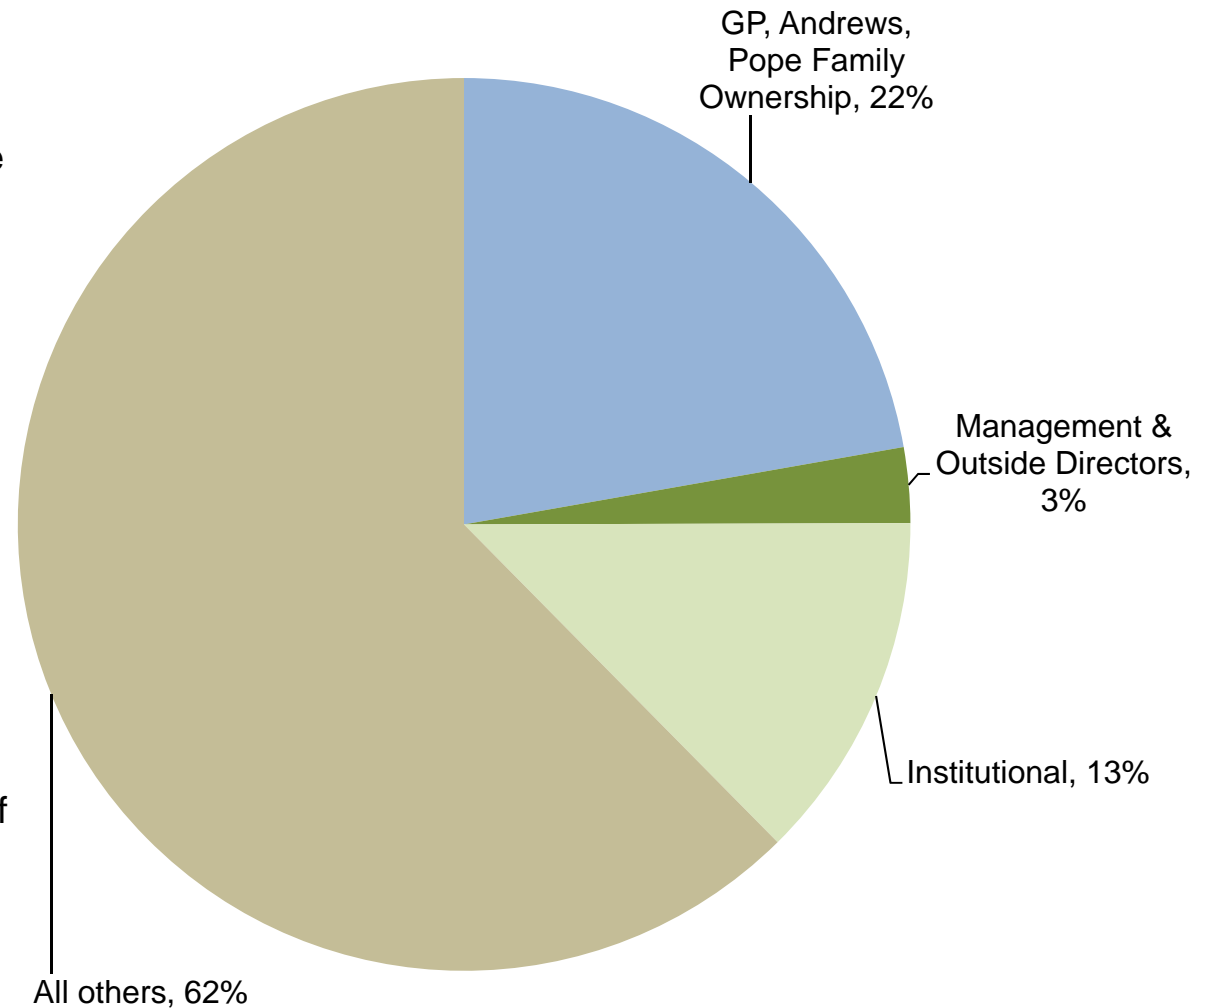

Ownership Detail

General Partners

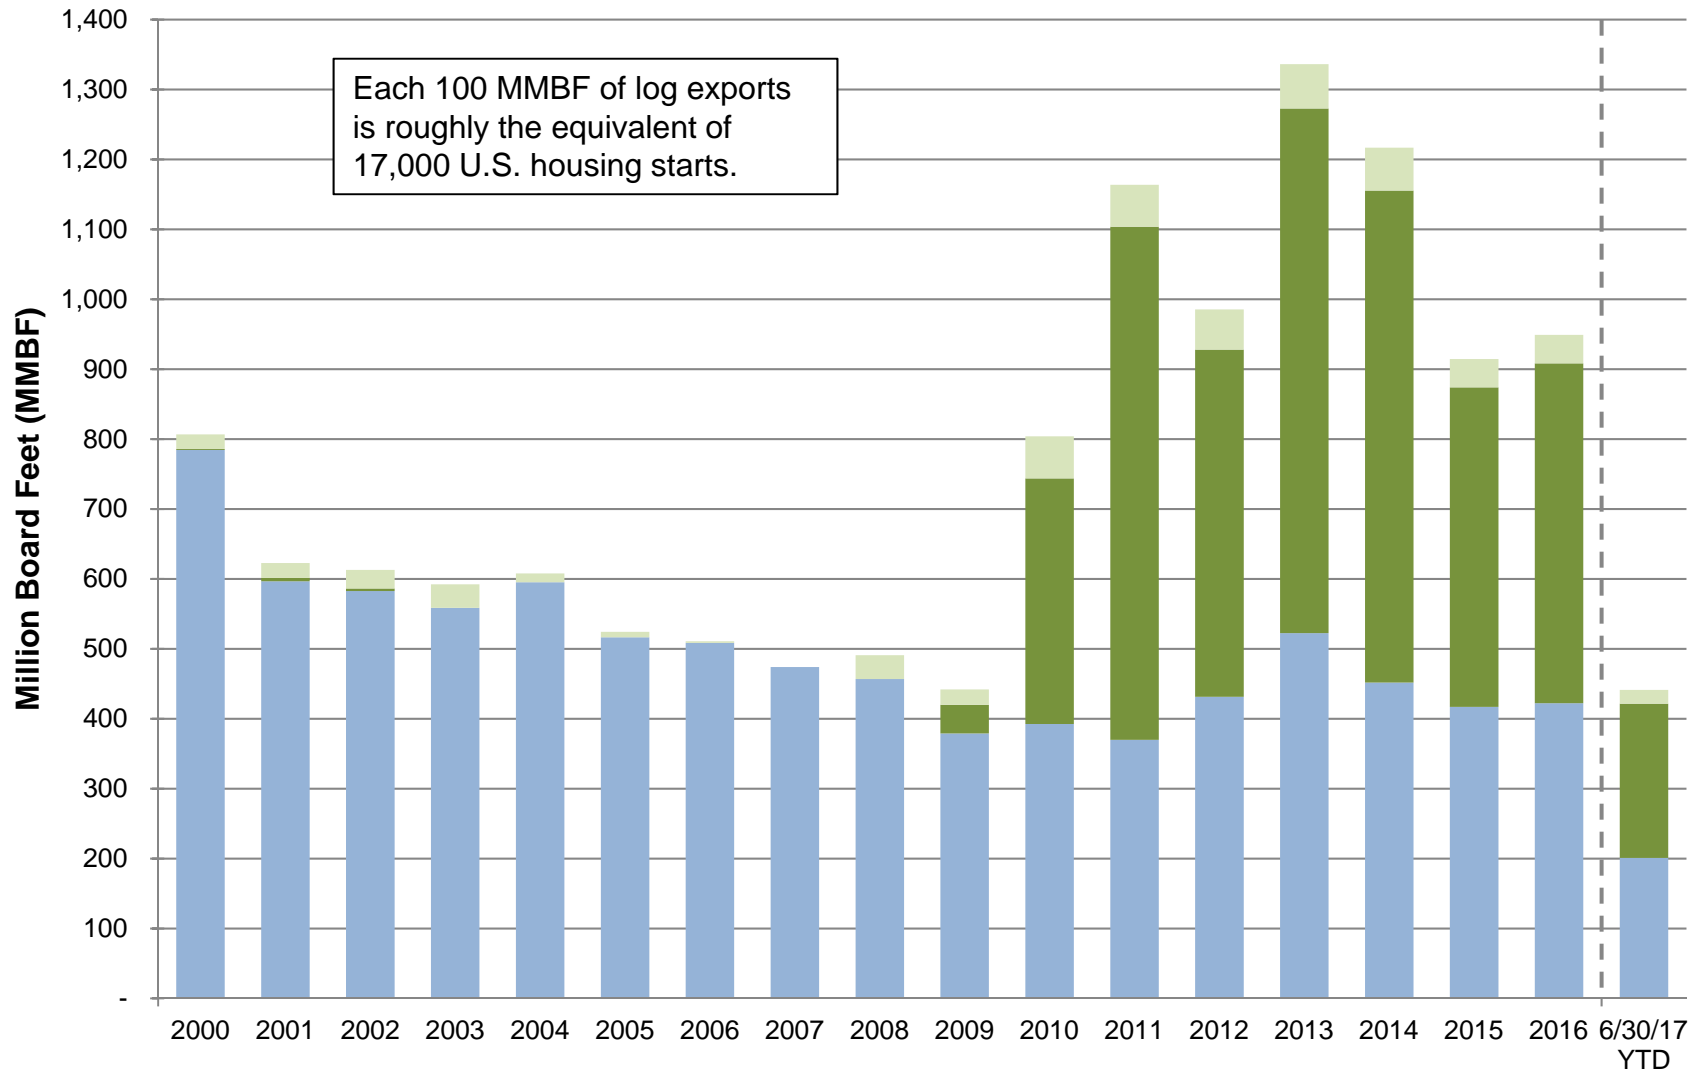

- Two corporate GP's collectively own 1.4% of Pope Resources
- Each of the GP's are owned 50/50 by Pope and Andrews families
- \$150,000/year management fee, unchanged since spinoff

Limited Partners

- Family position at 22% (including GP interest)
- Management and outside directors at 3%
- Total institutional ownership of 13%
- 62% held by high net worth and retail investors

Economies of Scale: Nominal Management Costs

- Placement of Fund I and II capital (2006-10) reduced per acre management costs
- Investments in processes and systems outpaced acres acquired with Fund III capital (2012-15)
- Following Mashel (4Q-15) and Carbon River (3Q-16) acquisitions, per acre management cost is now below level prior to launch of PE Timber business

Historical ORM Timber Fund Results

(Inception to June 30, 2017)

(in millions)	POPE	Third-party investors	Total
Paid-in capital	\$38.0	\$284.8	\$322.7
Distributions from operations	7.1	36.5	43.6
Distributions from refinancings	2.9	11.7	14.5
Distributions from asset sales	19.3	75.8	95.1
Residual value	29.0	247.3	276.3
Carried interest*	9.3	0.0	9.3
IRR	9.6%	6.0%	6.6%

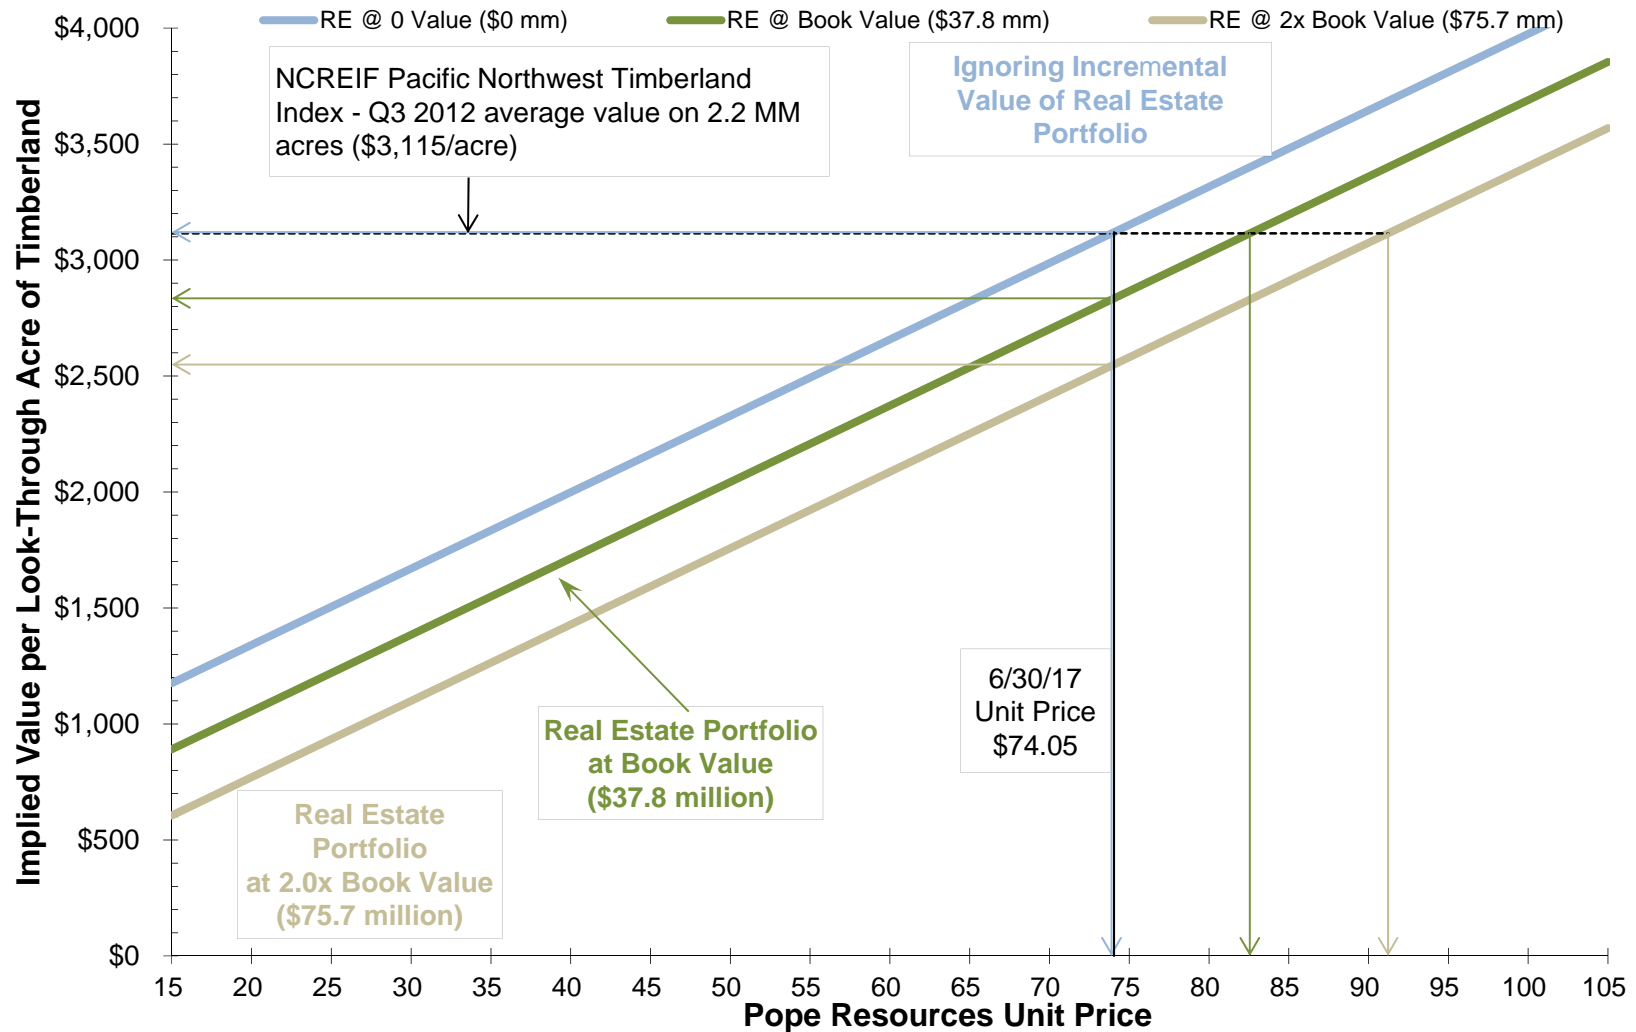

* Carried interest is not paid to POPE until the investors have received, in cash, all of their paid-in capital plus a preferred return of 8.0% annualized. This is unlikely to happen until a timber fund's properties are sold and the proceeds are distributed to investors. \$9.3 million represents the carried interest that would have been due to POPE had the Fund II properties been sold on 6/30/17 at their appraised value. The Fund II term does not end until March 2021.

Gap Between Public and Private Timberland Value

* In Q4 2012 and Q1 2013, NCREIF added 1.2 MM acres of timberland east of the Cascades to the PNW index which significantly reduced the average value of the index and resulted in changing its name to the NW index. The Q3 2012 value, though dated, is a more relevant comparison to the Partnership's look-through timberland holdings.
