

Q3 2015 Financial Supplement

Safe Harbor Statement

Certain statements in this presentation regarding anticipated financial outcomes including Rayonier's earnings guidance, if any, business and market conditions, outlook, expected dividend rate, Rayonier's business strategies, including expected harvest schedules, timberland acquisitions, sales of non-strategic timberlands, the anticipated benefits of Rayonier's business strategies and other similar statements relating to Rayonier's future events, developments or financial or operational performance or results, are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. These forward-looking statements are identified by the use of words such as "may," "will," "should," "expect," "estimate," "believe," "intend," "project," "anticipate" and other similar language. However, the absence of these or similar words or expressions does not mean that a statement is not forward-looking. While management believes that these forward-looking statements are reasonable when made, forward-looking statements are not guarantees of future performance or events and undue reliance should not be placed on these statements.

The following important factors, among others, could cause actual results or events to differ materially from those expressed in forward-looking statements that may have been made in this document: the cyclical and competitive nature of the industries in which we operate; fluctuations in demand for, or supply of, our forest products and real estate offerings; entry of new competitors into our markets; changes in global economic conditions and world events, including political changes in particular regions or countries; fluctuations in demand for our products in Asia, and especially China; various lawsuits relating to matters arising out of our previously announced internal review and restatement of our consolidated financial statements; the uncertainties of potential impacts of climate-related initiatives; the cost and availability of third party logging and trucking services; the geographic concentration of a significant portion of our timberland; our ability to identify, finance and complete timberland acquisitions; changes in environmental laws and regulations regarding timber harvesting, delineation of wetlands, and endangered species, that may restrict or adversely impact our ability to conduct our business, or increase the cost of doing so; adverse weather conditions, natural disasters and other catastrophic events such as hurricanes, wind storms and wildfires, which can adversely affect our timberlands and the production, distribution and availability of our products; interest rate and currency movements; our capacity to incur additional debt, and any decision we may make to do so; changes in tariffs, taxes or treaties relating to the import and export of our products or those of our competitors; changes in key management and personnel; our ability to meet all necessary legal requirements to continue to qualify as a real estate investment trust ("REIT") and changes in tax laws that could adversely affect tax treatment of our specific businesses or reduce the benefits associated with REIT status.

Specifically with respect to our Real Estate business, the following important factors, among others, could cause actual results to differ materially from those expressed in forward-looking statements that may have been made in this document: the cyclical nature of the real estate business generally, including fluctuations in demand for both entitled and unentitled property; a delayed or weak recovery in the housing market; the lengthy, uncertain and costly process associated with the ownership, entitlement and development of real estate, especially in Florida, which also may be affected by changes in law, policy and political factors beyond our control; the potential for legal challenges to entitlements and permits in connection with our properties; unexpected delays in the entry into or closing of real estate transactions; the existence of competing developers and communities in the markets in which we own property; the pace of development and the rate and timing of absorption of existing entitled property in the markets in which we own property; changes in the demographics affecting projected population growth and migration to the Southeastern U.S.; changes in environmental laws and regulations, including laws regarding water withdrawal and management and delineation of wetlands, that may restrict or adversely impact our ability to sell or develop properties; the cost of the development of property generally, including the cost of property taxes, labor and construction materials; the timing of construction and availability of public infrastructure; and the availability of financing for real estate development and mortgage loans.

For additional factors that could impact future results, please see Item 1A — Risk Factors in the company's most recent Annual Report on Form 10-K and similar discussion included in other reports that we subsequently file with the Securities and Exchange Commission (the "SEC").

Forward-looking statements are only as of the date they are made, and the Company undertakes no duty to update its forward-looking statements except as required by law. You are advised, however, to review any further disclosures we make on related subjects in our subsequent reports filed with the SEC.

(1) Reflects land with capital invested in infrastructure improvements.

(2) Excludes Improved Development.

(3) Calculated as development / rural acres sold (excluding sales in the Pacific Northwest region) over U.S. South acres owned.

Section 2

Supplemental Information

Definitions of Non-GAAP Measures and Pro Forma Items

Pro Forma Operating Income is defined as operating income adjusted for costs related to shareholder litigation and in 2014, internal review and restatement costs and cumulative out-of-period adjustment for depletion expense.

Pro Forma Net Income is defined as net income attributable to Rayonier Inc. adjusted for costs related to shareholder litigation, costs related to the write-off of capitalized financing costs, costs related to spin-off of Performance Fibers business, cumulative out-of-period adjustment for depletion expense, internal review and restatement costs and discontinued operations.

Adjusted EBITDA is defined as earnings before interest, taxes, depreciation, depletion, amortization, the non-cash cost of land sold and real estate development costs recovered upon sale, costs related to shareholder litigation, costs related to spin-off of the Performance Fibers business, internal review and restatement costs and discontinued operations. Adjusted EBITDA is a non-GAAP measure used by our Chief Operating Decision Maker, existing shareholders and potential shareholders to measure how the Company is performing relative to the assets under management.

Cash Available for Distribution (CAD) is defined as cash provided by operating activities adjusted for capital spending (excluding strategic acquisitions), real estate development costs, cash provided by discontinued operations and working capital and other balance sheet changes. CAD is a non-GAAP measure of cash generated during a period that is available for dividend distribution, repurchase of the Company's common shares, debt reduction and strategic acquisitions. CAD is not necessarily indicative of the CAD that may be generated in future periods.

Costs related to shareholder litigation is defined as expenses incurred as a result of the securities litigation, the shareholder derivative demands and the Securities and Exchange Commission investigation. See Note 12 — *Contingencies* of Item 1 — Financial Statements in the Company's most recent Quarterly Report on Form 10-Q.
