Safe Harbor Statement

Forward-Looking Statements - Certain statements in this presentation regarding anticipated financial outcomes including Rayonier's earnings guidance, if any, business and market conditions, outlook, expected dividend rate, Rayonier's business strategies, expected harvest schedules, timberland acquisitions and dispositions, the anticipated benefits of Rayonier's business strategies, and other similar statements relating to Rayonier's future events, developments or financial or operational performance or results, are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. These forward-looking statements are identified by the use of words such as "may," "will," "should," "expect," "estimate," "believe," "intend," "project," "anticipate" and other similar language. However, the absence of these or similar words or expressions does not mean that a statement is not forward-looking. While management believes that these forward-looking statements are reasonable when made, forward-looking statements are not guarantees of future performance or events and undue reliance should not be placed on these statements.

The following important factors, among others, could cause actual results or events to differ materially from those expressed in forward-looking statements that may have been made in this document: the cyclical and competitive nature of the industries in which we operate; fluctuations in demand for, or supply of, our forest products and real estate offerings, including any downturn in the housing market; entry of new competitors into our markets; changes in global economic conditions and geopolitical tensions, including the war in Ukraine and escalating tensions between China and Taiwan as well as in the middle east; business disruptions arising from public health crises and outbreaks of communicable diseases, fluctuations in demand for our products in Asia, and especially China; the uncertainties of potential impacts of climate-related initiatives; the cost and availability of third-party logging, trucking and ocean freight services; the geographic concentration of a significant portion of our timberland; our ability to identify, finance and complete timberland acquisitions and/or to complete dispositions; changes in environmental laws and regulations regarding timber harvesting, delineation of wetlands, endangered species and development of real estate generally, that may restrict or adversely impact our ability to conduct our business, or increase the cost of doing so; adverse weather conditions, natural disasters and other catastrophic events such as hurricanes, wind storms and wildfires; the lengthy, uncertain and costly process associated with the ownership, entitlement and development of real estate, especially in Florida and Washington, including changes in law, policy and political factors beyond our control; the availability of financing for real estate development and mortgage loans; changes in tariffs, taxes or treaties relating to the import and export of our products or those of our competitors; changes in key management and personnel; and our ability to meet all necessary legal requirements to continue to qualify as a real estate investment trust ("REIT") and changes in tax laws that could adversely affect beneficial tax treatment.

For additional factors that could impact future results, please see Item 1A - Risk Factors in the Company's most recent Annual Report on Form 10-K and similar discussion included in other reports that we subsequently file with the Securities and Exchange Commission (the "SEC"). Forward-looking statements are only as of the date they are made, and the Company undertakes no duty to update its forward-looking statements except as required by law. You are advised, however, to review any further disclosures we make on related subjects in our subsequent reports filed with the SEC.

Non-GAAP Financial Measures - To supplement Rayonier's financial statements presented in accordance with generally accepted accounting principles in the United States ("GAAP"), Rayonier uses certain non-GAAP measures, including "cash available for distribution," "pro forma sales," "pro forma operating income (loss)," "pro forma net income," and "Adjusted EBITDA," which are defined and further explained in this communication. Reconciliation of such measures to the nearest GAAP measures can also be found in this communication. Rayonier's definitions of these non-GAAP measures may differ from similarly titled measures used by others. These non-GAAP measures should be considered supplemental to, and not a substitute for, financial information prepared in accordance with GAAP.

Supplemental Information

Definitions of Non-GAAP Measures and Pro Forma Items

Adjusted EBITDA is defined as earnings before interest, taxes, depreciation, depletion, amortization, the non-cash cost of land and improved development, non-operating (income) expense, timber write-offs resulting from casualty events and Large Dispositions. Adjusted EBITDA is a non-GAAP measure that management uses to make strategic decisions about the business and that investors can use to evaluate the operational performance of the assets under management. It excludes specific items that management believes are not indicative of the Company's ongoing operating results.

Cash Available for Distribution (CAD) is defined as cash provided by operating activities adjusted for capital spending (excluding timberland acquisitions and real estate development investments) and working capital and other balance sheet changes. CAD is a non-GAAP measure of cash generated during a period that is available for common stock dividends, distributions to operating partnership unitholders, distributions to noncontrolling interests, repurchase of the Company's common shares, debt reduction, timberland acquisitions and real estate development investments. CAD is not necessarily indicative of the CAD that may be generated in future periods.

Large Dispositions are defined as transactions involving the sale of productive timberland assets that exceed \$20 million in size and do not reflect a demonstrable premium relative to timberland value.

Timber write-offs resulting from casualty events includes the write-off of merchantable and pre-merchantable timber volume damaged by casualty events that cannot be salvaged.

Pension settlement charges, net of tax reflects the net loss recognized in connection with the termination and settlement of the Company's defined benefit plan.

Net cost (recovery) on legal settlements reflects the net loss (gain) from litigation regarding insurance claims.

Pro forma net income is defined as net income attributable to Rayonier Inc. adjusted for its proportionate share of the net costs (recoveries) associated with legal settlements, timber write-offs resulting from casualty events, pension settlement charges and Large Dispositions. Rayonier believes that this non-GAAP financial measure provides investors with useful information to evaluate our core business operations because it excludes specific items that are not indicative of the Company's ongoing operating results.

Pro forma net income adjustments attributable to noncontrolling interests are the proportionate share of pro forma items that are attributable to noncontrolling interests.

Pro forma operating income (loss) is defined as operating income (loss) adjusted for timber write-offs resulting from casualty events and Large Dispositions. Rayonier believes that this non-GAAP financial measure provides investors with useful information to evaluate our core business operations because it excludes specific items that are not indicative of the Company's ongoing operating results.

Pro forma sales is defined as revenue adjusted for Large Dispositions. Rayonier believes that this non-GAAP financial measure provides investors with useful information to evaluate our core business operations because it excludes specific items that are not indicative of the Company's ongoing operating results.
