

INVESTOR PRESENTATION

May 2022

Forward-Looking Statements

Forward-Looking Statements - Certain statements in this presentation regarding anticipated financial outcomes including Rayonier's earnings guidance, if any, business and market conditions, outlook, expected dividend rate, Rayonier's business strategies, expected harvest schedules, timberland acquisitions and dispositions, the anticipated benefits of Rayonier's business strategies, and other similar statements relating to Rayonier's future events, developments or financial or operational performance or results, are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. These forward-looking statements are identified by the use of words such as "may," "will," "should," "expect," "estimate," "believe," "intend," "project," "anticipate" and other similar language. However, the absence of these or similar words or expressions does not mean that a statement is not forward-looking. While management believes that these forward-looking statements are reasonable when made, forward-looking statements are not guarantees of future performance or events and undue reliance should not be placed on these statements.

The following important factors, among others, could cause actual results or events to differ materially from those expressed in forward-looking statements that may have been made in this document: the cyclical and competitive nature of the industries in which we operate; fluctuations in demand for, or supply of, our forest products and real estate offerings; including any downturn in the housing market; entry of new competitors into our markets; changes in global economic conditions and world events; business disruptions arising from public health crises and outbreaks of communicable diseases, including the current outbreak of the virus known as the novel coronavirus; fluctuations in demand for our products in Asia, and especially China; the uncertainties of potential impacts of climate-related initiatives; the cost and availability of third party logging and trucking services; the geographic concentration of a significant portion of our timberland; our ability to identify, finance and complete timberland acquisitions; changes in environmental laws and regulations regarding timber harvesting, delineation of wetlands, and endangered species, that may restrict or adversely impact our ability to conduct our business, or increase the cost of doing so; adverse weather conditions, natural disasters and other catastrophic events such as hurricanes, wind storms and wildfires, which can adversely affect our timberlands and the production, distribution and availability of our products; interest rate and currency movements; our capacity to incur additional debt; changes in tariffs, taxes or treaties relating to the import and export of our products or those of our competitors; changes in key management and personnel; our ability to meet all necessary legal requirements to continue to qualify as a real estate investment trust ("REIT") and changes in tax laws that could adversely affect beneficial tax treatment; the cyclical nature of the real estate business generally; the lengthy, uncertain and costly process associated with the ownership, entitlement and development of real estate, especially in Florida and Washington, which also may be affected by changes in law, policy and political factors beyond our control; unexpected delays in the entry into or closing of real estate transactions; changes in environmental laws and regulations that may restrict or adversely impact our ability to sell or develop properties; the timing of construction and availability of public infrastructure; and the availability of financing for real estate development and mortgage loans.

For additional factors that could impact future results, please see Item 1A - Risk Factors in the Company's most recent Annual Report on Forms 10-K and 10-Q and similar discussion included in other reports that we subsequently file with the Securities and Exchange Commission (the "SEC"). Forward-looking statements are only as of the date they are made, and the Company undertakes no duty to update its forward-looking statements except as required by law. You are advised, however, to review any further disclosures we make on related subjects in our subsequent reports filed with the SEC.

Non-GAAP Financial Measures - To supplement Rayonier's financial statements presented in accordance with generally accepted accounting principles in the United States ("GAAP"), Rayonier uses certain non-GAAP measures, including "cash available for distribution," and "Adjusted EBITDA," which are defined and further explained in this communication. Reconciliation of such measures to the nearest GAAP measures can also be found in this communication. Rayonier's definitions of these non-GAAP measures may differ from similarly titled measures used by others. These non-GAAP measures should be considered supplemental to, and not a substitute for, financial information prepared in accordance with GAAP.

Mission:

Provide industry-leading financial returns to our shareholders while serving as a responsible steward of the environment and a beneficial partner to the communities in which we operate

Highly Productive, Geographically Diversified Timberlands

2.7 MILLION TOTAL ACRES

Rayonier is the Leading “Pure Play” Timber REIT

Rayonier

2019 – 2021 EBITDA*
Composition

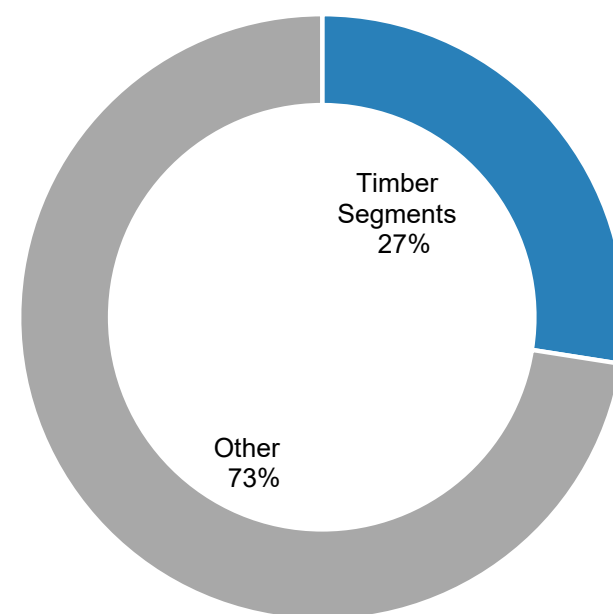

Peer Group EBITDA* Composition (2019 – 2021)

Peer Group

2019 – 2021 EBITDA*
Composition

Over the last three years, Rayonier has generated 73% of its EBITDA* from timber operations (versus 27% for the peer group).

Rayonier Portfolio Highlights

Sector-Leading U.S. South EBITDA per Ton

Sector-Leading HBU Value Realizations

Improving Harvest Profile ⁽²⁾

Unique Exposure to China Export Market

- (1) Excludes Large Dispositions, Improved Development and Conservation Easements.
 (2) Based on Rayonier estimates; assumes current portfolio with no acquisitions or divestitures.
 (3) Based on estimated export volume sold into China market.

Pope Resources Post-Acquisition Highlights

Indicative Enterprise Value Breakdown

(~\$656 MM Enterprise Value @ Announcement – Jan. 2020) ⁽¹⁾

- Partnership Timber

- Real Estate / HBU
- Other

Fee Timber

Strong growth in PNW Timber Segment EBITDA* per Acre / Ton

Timber Funds

Fully exited the Funds business for total proceeds of \$73mm

Real Estate / HBU

Realized HBU sales of \$46mm (vs implied Real Estate valuation of ~\$45mm @ acquisition); significant HBU acreage remaining

(\$ in 000s, except per acre values)	Revenue	Acres	Price/Acre
Arborwood	\$37,500	359	\$104,579
Other HBU Sales	1,215	51	23,775
Total HBU Sales	\$38,715	410	\$94,501
Conservation Easements	6,954	2,165	3,212
Total Revenue	\$45,669	NA	NA

Rayonier's Strategic Priorities

MANAGE FOR LONG-TERM VALUE

- Design harvest strategy to achieve long-term, sustainable yield
- Balance biological growth, harvest cash flow and responsible stewardship

ACQUIRE HIGH-QUALITY TIMBERLANDS

- Pursue acquisitions that improve portfolio quality and sustainable yield
- Maintain disciplined approach to acquisitions; minimize HBU speculation

OPTIMIZE PORTFOLIO VALUE

- Opportunistically monetize lands where premium valuations can be achieved
- Pursue value creation activities on select properties to enhance long-term value

FOCUS ON QUALITY OF EARNINGS

- Focus on harvest operations and rural land sales to support dividends
- De-emphasize sale of “non-strategic” timberlands to augment cash flow

POSITION FOR LOW-CARBON ECONOMY

- Capitalize on increasing demand for carbon solutions / sequestration
- Integrate ecosystem services opportunities into long-term strategic planning

BEST-IN-CLASS STEWARDSHIP & DISCLOSURE

- Develop and integrate robust ESG policies and best practices
- Establish Rayonier as industry leader in transparent disclosure

Prudent Capital Structure & Financial Policy

Credit Highlights & Ratio Targets

Current Credit Ratings

- S&P: BBB- / Stable
- Moody's: Baa3 / Stable

Credit Highlights

- Strong Adj. EBITDA* margins
- High EBITDA-to-FCF conversion
- Significant asset coverage
- 2.7% weighted avg. cost of debt / 100% fixed

Credit Ratio Targets

- Committed to maintaining an investment grade credit profile
- Target credit metrics include:
 - Net Debt / Adj. EBITDA*: $\leq 4.5x$
 - Net Debt / Asset Value: $\leq 30\%$

Capitalization & Maturity Profile

(\$ in millions)	3/31/2022
Total Debt ⁽¹⁾	\$1,254.1
(–) Cash	(256.5)
Net Debt	\$997.6
<u>Credit / Valuation Data</u>	
2021 Adjusted EBITDA*	\$329.8
Shares / OP Units Outstanding	149.4
Enterprise Value ⁽²⁾	\$7,141.8
<u>Credit Statistics</u>	
Net Debt / Adjusted EBITDA*	3.0x
Net Debt / Enterprise Value ⁽²⁾	14%

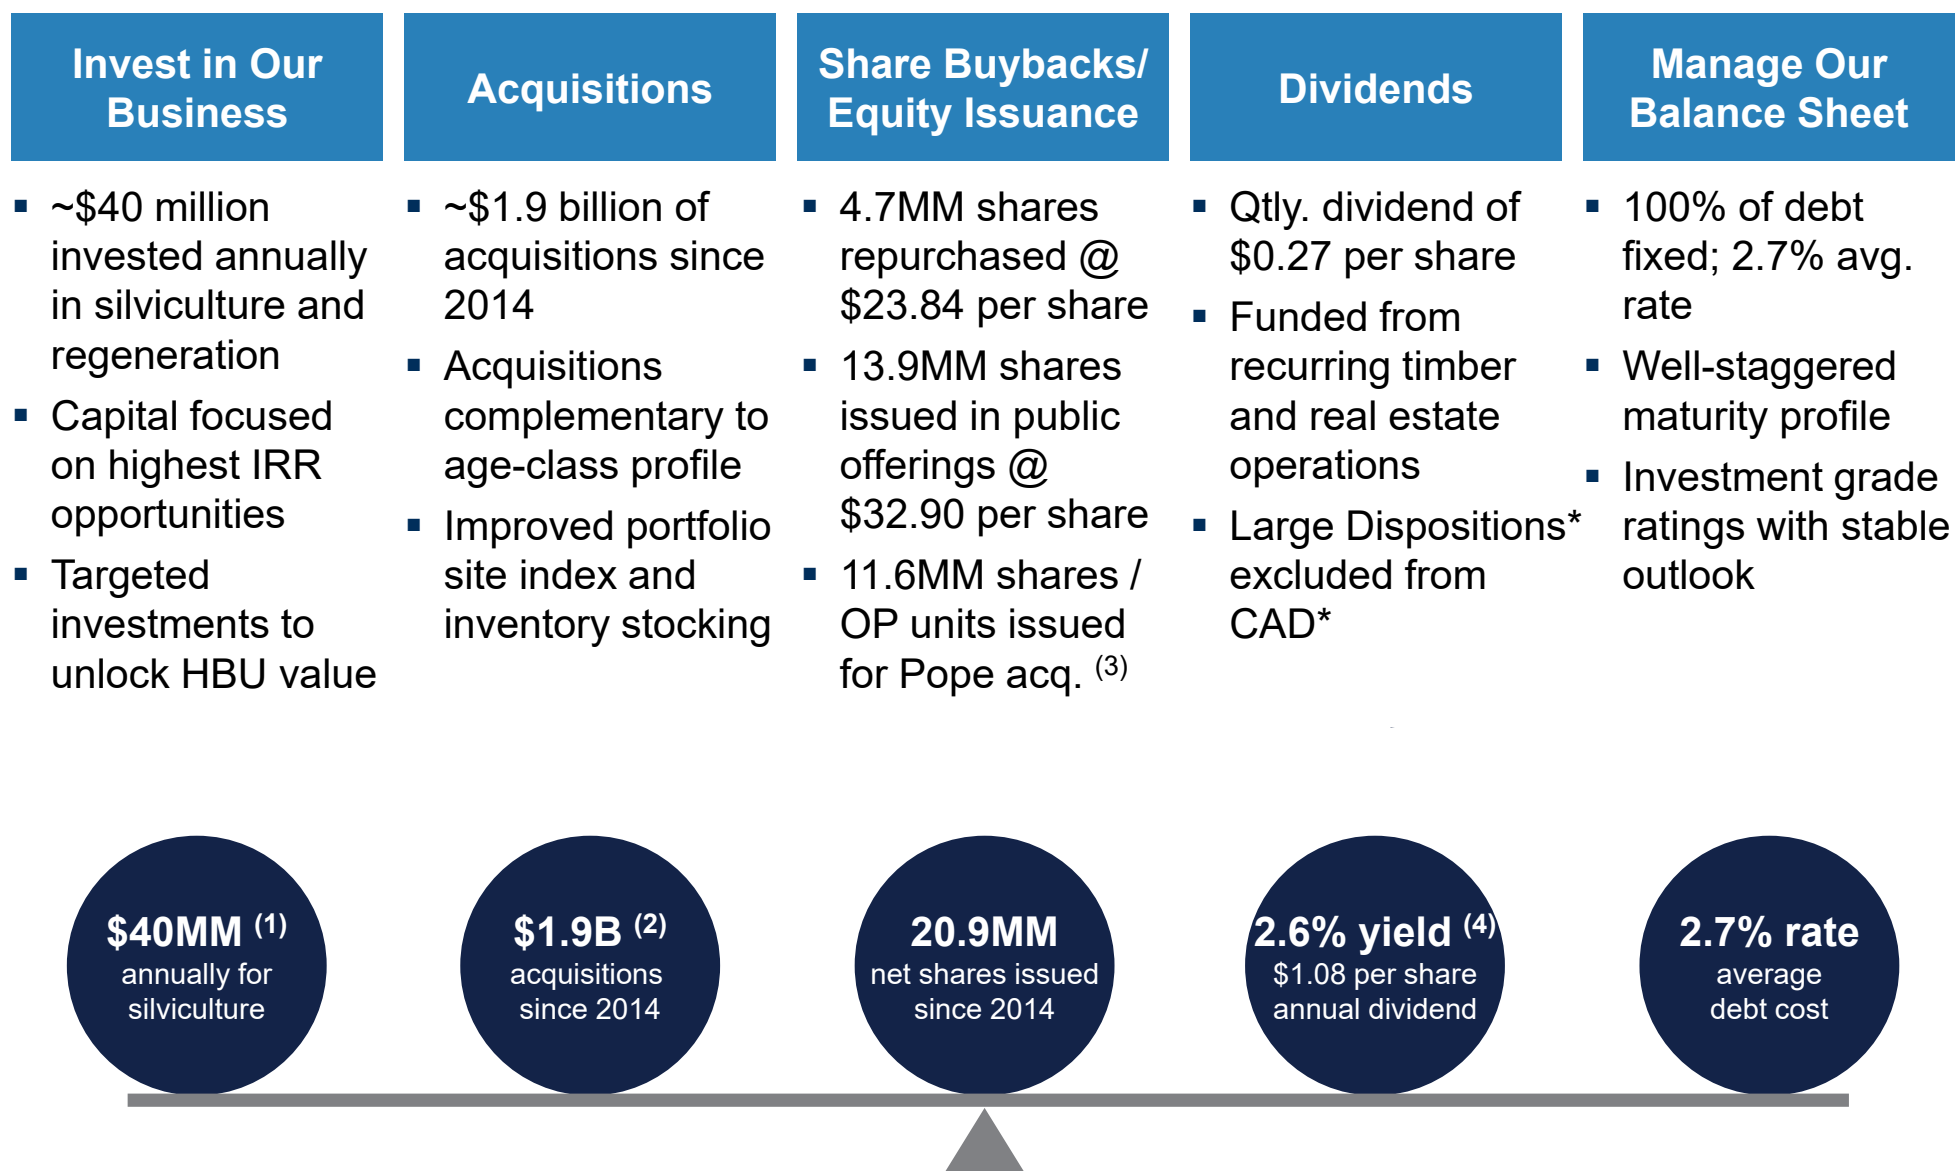

Rayonier has a strong, investment grade credit profile with significant asset coverage.

(1) Debt reflects principal on long-term debt, gross of deferred financing costs and unamortized discounts.

(2) Enterprise value based on market capitalization (including Rayonier, L.P. "OP units") plus net debt based on RYN share price of \$41.12 as of 3/31/22.

* Non-GAAP measure or pro forma item (see Appendix for definitions and RYN reconciliations).

Nimble Approach to Capital Allocation

(1) Represents average annual investment in silviculture and replanting from 2020 – 2021.

(2) Includes total Pope Resources transaction value at closing (i.e., consideration plus net debt assumed of \$576 million).

(3) RYN share price at time of transaction announcement was \$32.72.

(4) Based on share price of \$41.12 as of 3/31/22 and annualized dividend of \$1.08 per share.

* Non-GAAP measure or pro forma item (see Appendix for definitions and RYN reconciliations).

Key Industry Trends

Housing Indicators Remain Favorable

Housing Sector is Underbuilt

Home Inventory has Diminished

Homeownership Economics are Favorable

U.S. Housing Stock has Aged Considerably

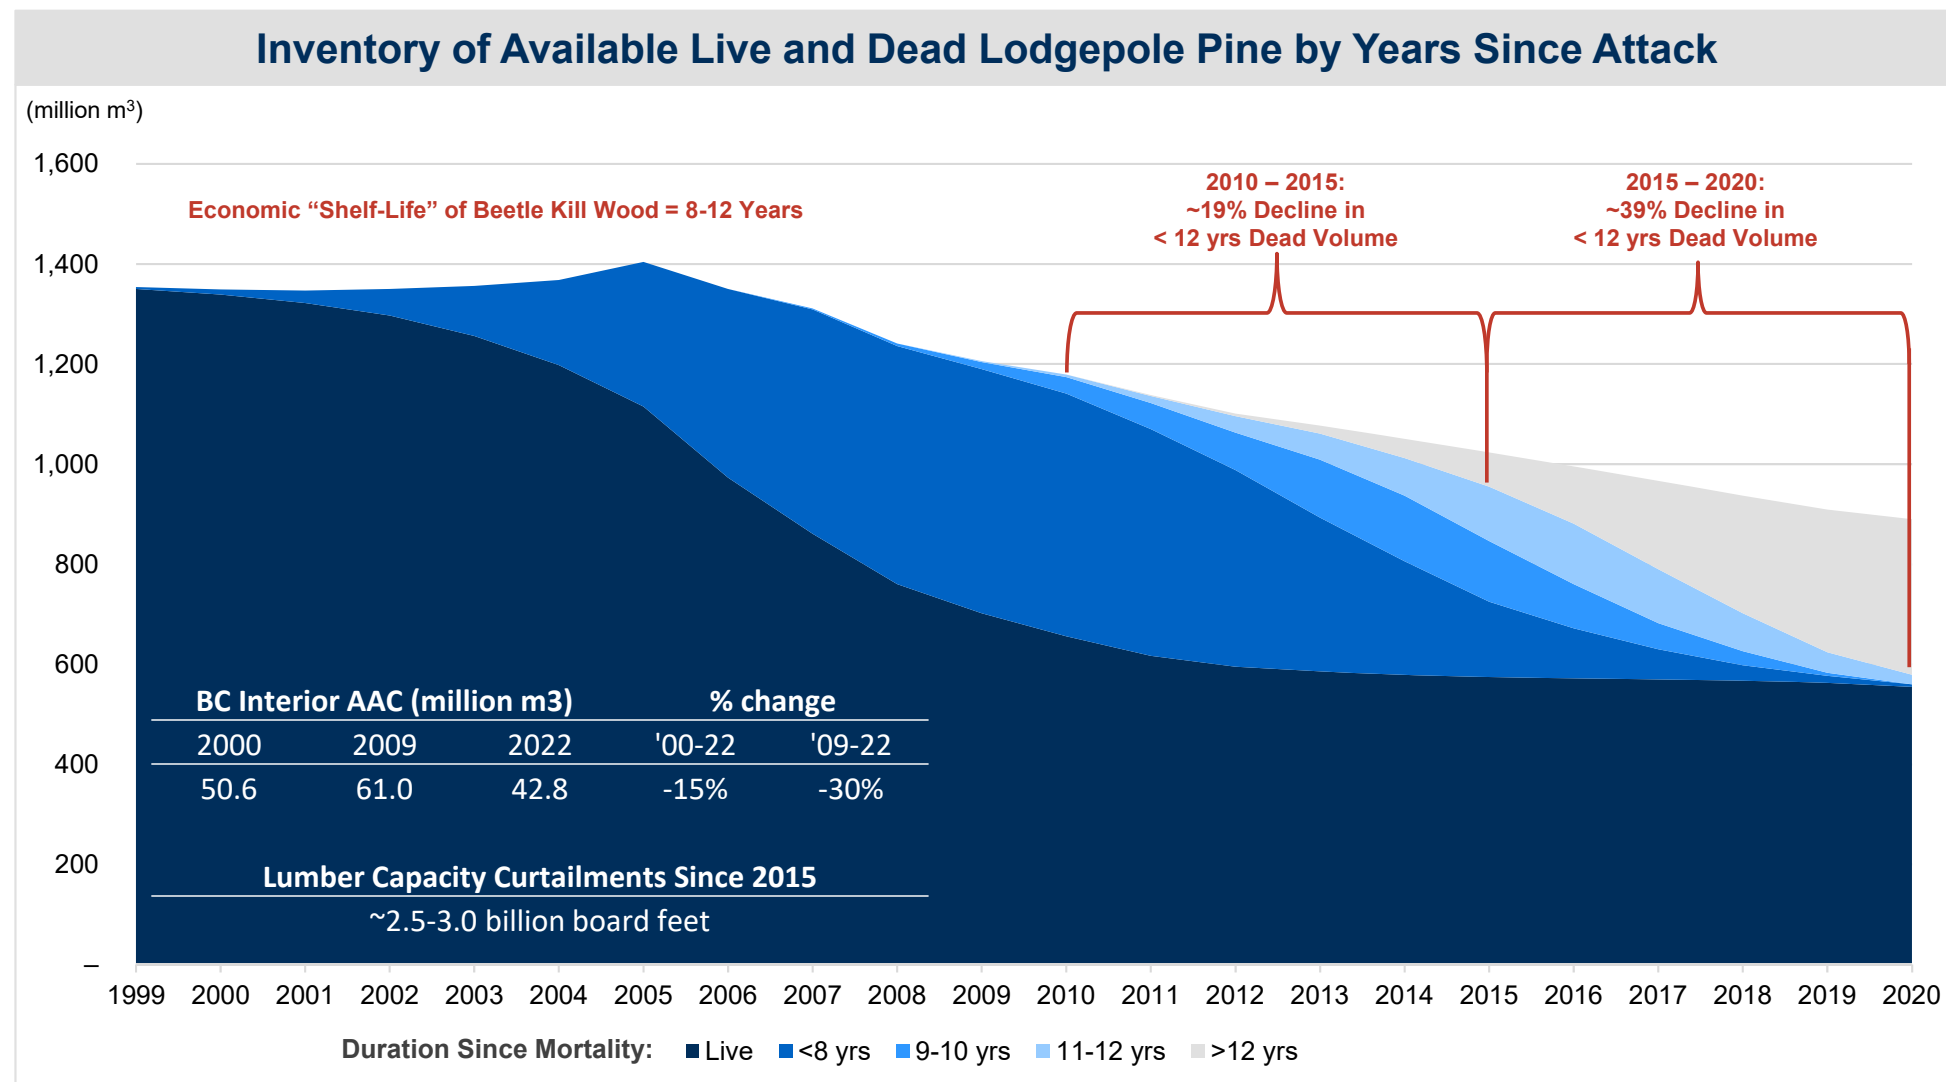

Housing Starts Are Trending Higher

Historical Annual Housing Starts

Total U.S. housing starts have increased for twelve consecutive years and are expected to improve further in 2022 due to strong single-family demand.

Availability of Viable B.C. Timber Has Declined Rapidly

The mountain pine beetle epidemic is expected to significantly constrain the availability of economically viable pine inventory in B.C. for many decades.

China's Large Timber Supply Deficit is Growing

Softwood log and lumber imports into China are expected to remain strong given its growing timber supply deficit.

Chinese Log & Lumber Imports Rely on NZ and Russia

New Zealand has captured a significant share of the growth in China's log import volume.

Positioned to Access Key Ports

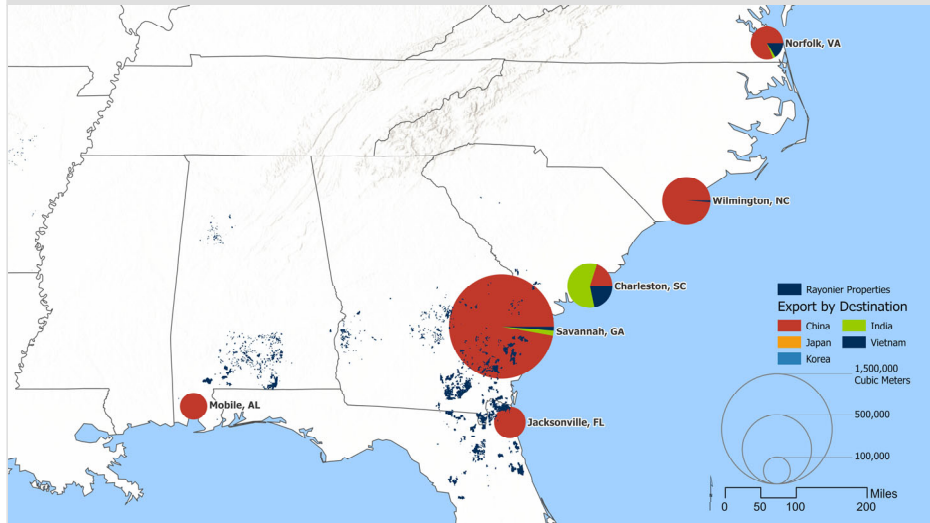

Pacific Northwest Log Exports
Port and Destination – 2021

Pacific Northwest Exports by Destination

U.S. South Log Exports
Port and Destination – 2021

U.S. South Log Exports by Destination

European Spruce Beetle Epidemic

European spruce beetle epidemic has driven increased competitive supply into China market.

Deconstructing Timberland Returns

U.S. South Historical Valuation Snapshot

U.S. South EBITDA per Acre (NCREIF)

U.S. South Value per Acre (NCREIF)

U.S. South EBITDA Multiples (NCREIF)

U.S. South timberlands have traded at an average EBITDA multiple (excluding land sales) of ~37x over the last 32 years.

Historical Components of U.S. South Timberland Returns

NCREIF South Historical Returns

NCREIF South Historical EBITDA Returns vs. 10-Year Treasury

U.S. South timberlands have historically been bid to EBITDA cap rates in the range of 2.5% to 3.0%.

Components of Timberland Return – U.S. South

Return Component	Value Range	Risk to Achieve	Comments
Cash Return Expectation			
EBITDA Return	2.0% – 4.5%		EBITDA yield for Southern timber, including timber harvest and non-timber income
(–) Capex Investment	~(0.5%)		Average annual cost of replanting / silviculture; can vary based on site
Current Cash Flow Return	1.5% – 4.0%		Varies based on market quality, site index / productivity, stocking, etc.
Other Components of Return			
Productivity Gains	0.5% – 1.0%		Based on improved silviculture; higher gain potential on lower quality properties
HBU Uplift	0.0% – 1.0%		Requires market for rural property; proximity to population centers is key
Return to Trend Pricing	0.0% – 1.5%		Higher “return-to-trend” assumption is common in more depressed markets
Long-Term “Real” Price Growth	0.0% – 0.5%		Long-term expectation of real price increases above inflation
Total Return Expectation			
Typical “Real” Return Expectation	4.5% – 5.5%	Varies	Represents typical timberland real discount rate range
(+) Assumed Inflation	~2.0%		Based on long-term historical spread between treasuries and TIPS
“Nominal” Return Expectation	6.5% – 7.5%	Varies	Represents expected long-term, unlevered return on timberland investments

Productivity is a Key Driver of Timberland Value

Rayonier U.S. South Pine Site Index₂₅ (feet)

Harvest Volume Increases with Site Index ⁽¹⁾

Product Mix Improves with Site Index ⁽¹⁾

Higher site index properties generate greater harvest yields and a more valuable product mix. Improving site index by 10 feet over a 25-year harvest rotation implies ~1% annual productivity gain.

Rayonier Historical Real Estate / HBU Summary

Historical Acres Sold / % of Total Southern Acreage

Historical HBU Value per Acre / Premium to NCREIF Index

Rayonier has generally sold 1.0% to 2.0% of its Southern land base annually at premiums in the range of ~50% above timberland value, with premiums improving more recently.

Illustrative HBU Economics

Example: 1 Million Acre U.S. South Portfolio

(\$ in 000s, excepts per acre values)

Sales Pace / Premium	1.0% / 50.0%	1.5% / 75.0%
Illustrative Asset Profile		
U.S. South Portfolio Acres (000s)	1,000	1,000
Timberland Value per Acre ⁽¹⁾	\$1,849	\$1,849
Implied Total Asset Value	\$1,848,974	\$1,848,974
Implied HBU Inputs		
# of Acres Sold Annually	10,000	15,000
Implied HBU Price per Acre	\$2,773	\$3,236
HBU Premium per Acre	\$924	\$1,387
HBU Contribution to Return		
HBU Sales Revenue	\$27,735	\$48,536
(-) Real Estate Overhead Costs ⁽²⁾	(2,773)	(4,854)
Implied Adjusted EBITDA	\$24,961	\$43,682
(-) Acquire Replacement Timberlands ⁽³⁾	(18,490)	(27,735)
Residual Cash Flow	\$6,471	\$15,947
Residual Cash Flow / Total Asset Value	0.4%	0.9%

HBU Incremental Return Sensitivity Analysis

(% incremental return)

		Premium to Timberland Value				
% of Acreage Sold		–	25%	50%	75%	100%
	0.50%	(0.1%)	0.1%	0.2%	0.3%	0.4%
	0.75%	(0.1%)	0.1%	0.3%	0.4%	0.6%
	1.00%	(0.1%)	0.1%	0.4%	0.6%	0.8%
	1.25%	(0.1%)	0.2%	0.4%	0.7%	1.0%
	1.50%	(0.2%)	0.2%	0.5%	0.9%	1.2%

Peer Group Real Estate Prices (2020 – 2021) ⁽⁴⁾

A well-designed HBU program should be able to generate roughly 0.5% to 1.0% of incremental return relative to underlying timberland returns (depending on the quality of HBU product).

Deconstructing Timberland Returns – Illustrative Acquisitions

Illustrative Acquisition Scenario B – High Productivity Asset / Top Quartile Market

Assumed Portfolio Profile	
Location	FL-1
Composite Stumpage Price ⁽¹⁾	\$26.61
Site Index	80
Volume per Acre per Year ⁽²⁾	5.0
Implied EBITDA per Acre ⁽³⁾	\$133
Assumed Value per Acre	\$3,000

Timber Segments Overview

Southern Timber – Portfolio Overview

Highlights / Location

- Acreage: 1.8 million acres
- Sustainable Yield: 6.1 – 6.5 million tons
- Planted / Plantable: 67%
- Average Site Index: 72 feet at age 25 ⁽¹⁾
- 2021 EBITDA*: \$120.2 million
- Sustainable Forestry Initiative Certification

Five-Year Performance Summary

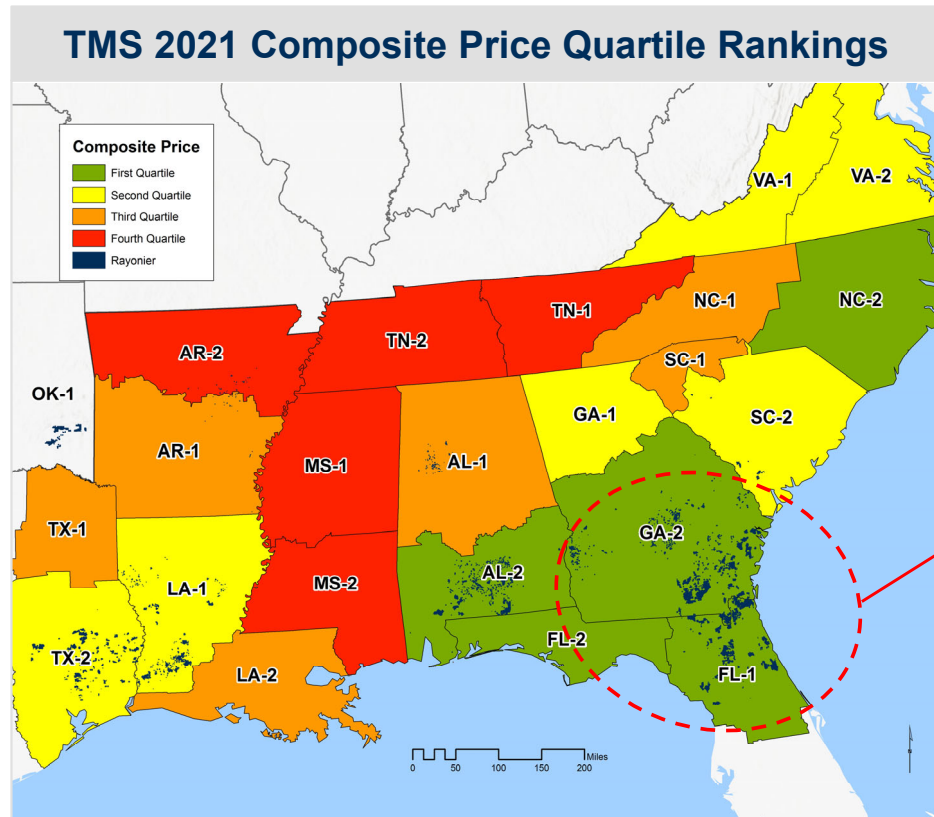

Balanced Age Class Profile ⁽²⁾

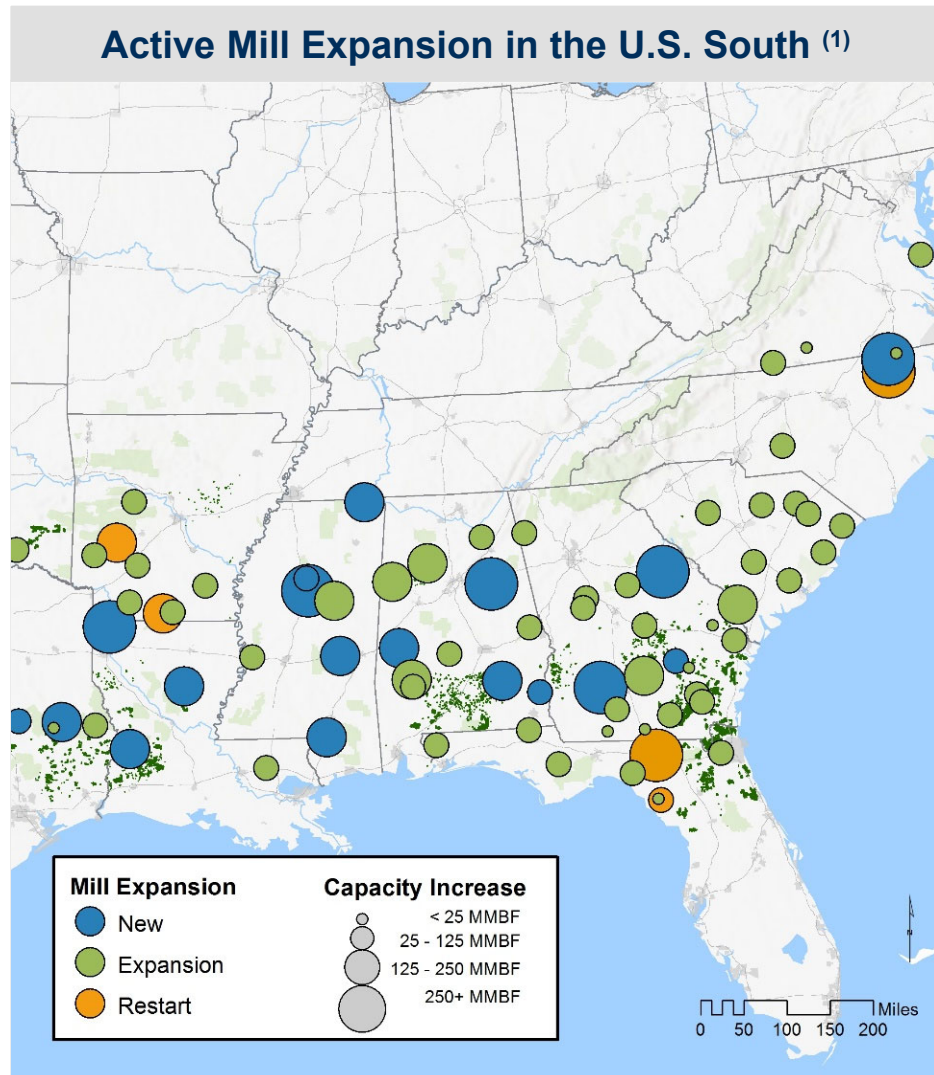

RYN Concentrated in Strongest U.S. South Markets

- Supply / demand dynamics are highly localized, as logs generally travel less than 100 miles
- Timber consumption vs. inventory growth remains much more tensioned in Coastal Atlantic markets

Approximately 60% of Rayonier's Southern timberlands are located in the top three markets (ranked by TimberMart-South composite stumpage pricing).

Lumber Capacity Expansion in U.S. South

Lumber production and capacity in the U.S. South has grown significantly over the last several years.

Pulpwood Supports Composite Prices in Strong Markets

U.S. South-wide Average Stumpage Pricing

Strong Markets Support Composite Pricing

Weaker Markets Hinder Composite Pricing

As sawtimber pricing eroded in the U.S. South, increased pulpwood pricing has helped support the overall composite price in strong markets where Rayonier focuses its ownership.

U.S. South EBITDA* Benchmarking

- EBITDA* per ton best captures profitability per unit of sales
- EBITDA* per acre can be misleading due to differential rates of harvest

Rayonier has consistently delivered sector-leading EBITDA* per ton in the U.S. South.

Pacific Northwest Timber – Portfolio Overview

Highlights / Location

- Acreage: 486,000 acres
- Sustainable Yield: 1.75 – 1.85 million tons
- Planted / Plantable: 78%
- Average Site Index: 108 feet at age 50 ⁽¹⁾
- 2021 EBITDA*: \$57.3 million
- Sustainable Forestry Initiative Certification

Five-Year Performance Summary

Improving Age Class Profile ⁽²⁾

Pacific Northwest Demand & Pricing Trends

Pacific Northwest Log Demand & Pricing

Pacific Northwest pricing increased in 2021 due to strong domestic lumber markets and improved export market demand.

Pacific Northwest EBITDA* Benchmarking

- Following November 2014 announcements, Rayonier reduced its rate of harvest in the Northwest
- Rayonier's Pacific Northwest EBITDA* per ton has historically been below the peer group due to its higher proportion of hemlock volume (vs. Doug-fir) and higher mix of cable logging

EBITDA* per ton and EBITDA* per acre both trended higher in 2020 and 2021 as a result of the Pope acquisition and higher pricing.

New Zealand Timber – Portfolio Overview

Highlights / Location

- Acreage: 419,000 acres (297,000 productive acres)
- Sustainable Yield: 2.4 – 2.7 million tons
- Planted / Plantable: 71%
- Average Site Index: 94 feet at age 20 ⁽¹⁾
- 2021 EBITDA*: \$78.5 million
- FSC® and PEFC™ Certification
- Appraised value as of 12/31/21: NZ\$1,957 million ⁽³⁾

Five-Year Performance Summary

Balanced Age Class Profile (Radiata) ⁽²⁾

Diversified Mix of Domestic & Export Markets

Volume by Market Destination (2021)

Over half of the New Zealand segment's volume (excluding Trading volume) is sold into export markets, with China being the largest source of demand.

Inventory Levels Drive Near-Term Price Fluctuations

Export supply / demand is generally considered in balance when the ratio of port inventory to average monthly demand is between 1.4 and 1.9 times. Inventory typically spikes around the Chinese New Year.

New Zealand Productivity Strong Relative to U.S.

In addition to providing market diversification, New Zealand offers superior softwood plantation productivity relative to the U.S.

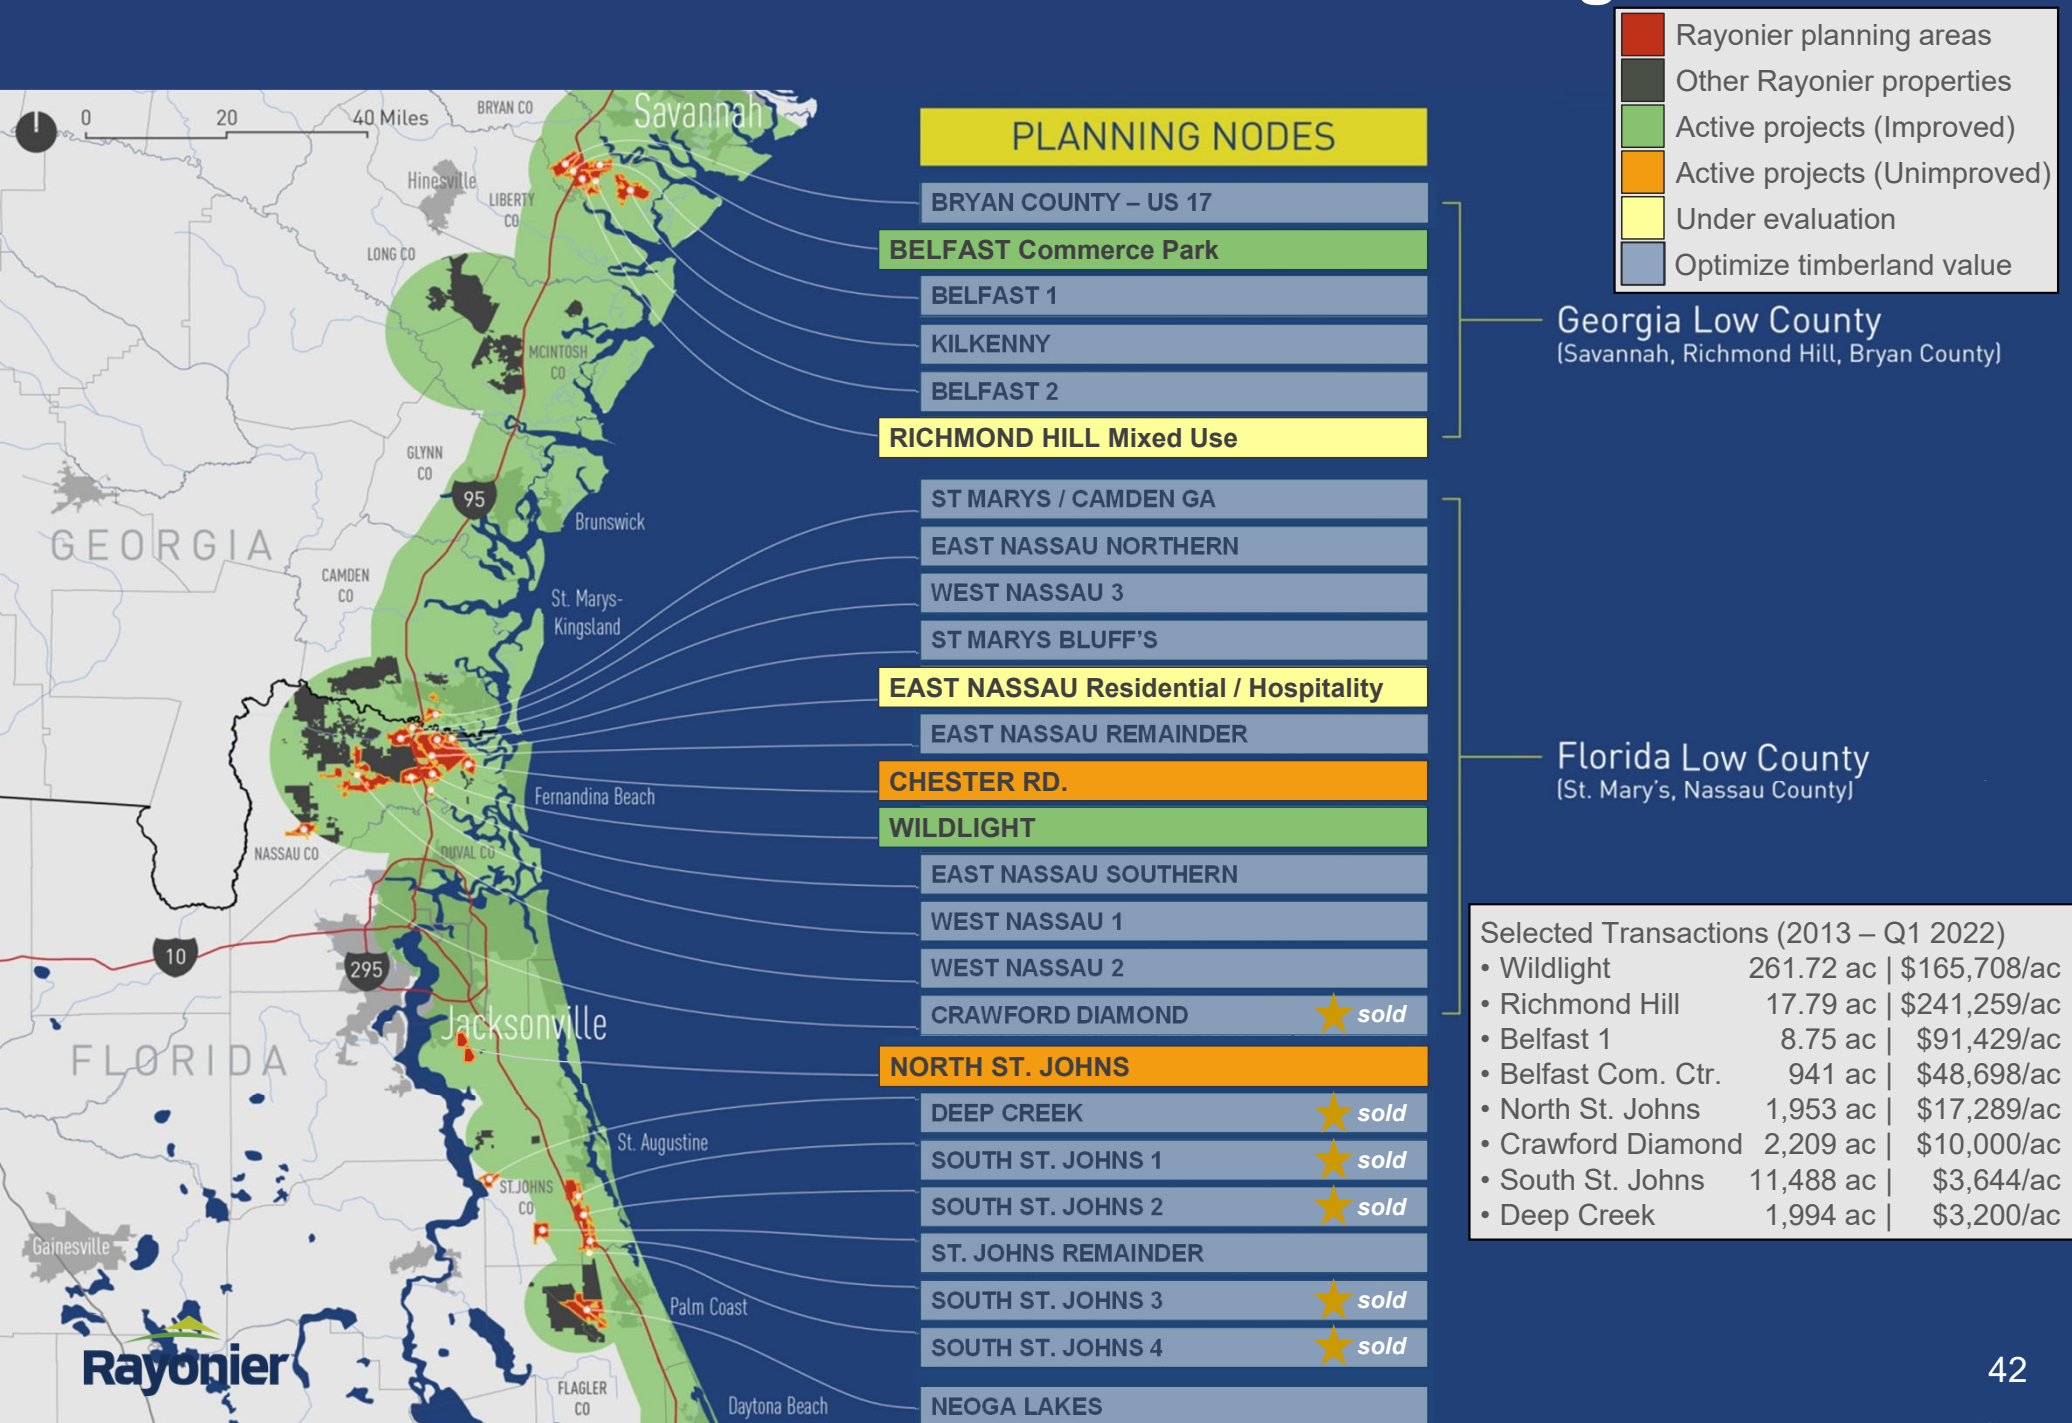

Real Estate / HBU Strategy

Real Estate Strategy – Optimize Value & Create Optionality

Timberlands		Real Estate		
				
Large Dispositions	Timberland & Non-Strategic	Rural	Unimproved Development	Improved Development
Strategic sales of timberland	Sale of timberland & non-strategic assets	Sale of rural places & properties	Sale of properties with development rights	Sale of developed land parcels
<ul style="list-style-type: none"> Opportunistic-only for capital allocation Upgrade portfolio Excluded from Adj. EBITDA and pro-forma financials 	<ul style="list-style-type: none"> Little to no premium to timberland value Monetize and repurpose “dead capital” 	<ul style="list-style-type: none"> Capture premium to timberland value Build a pipeline of enhanced rural properties in higher potential markets 	<ul style="list-style-type: none"> Invest in securing development rights Build a pipeline of entitled properties in higher potential markets 	<ul style="list-style-type: none"> Invest in infrastructure and amenities Enhance value and create optionality of adjacent RYN properties

I-95 Coastal Corridor – Active Portfolio Management

Overview of Wildlight Community Development

WILDLIGHT

FLORIDA LOWCOUNTRY LIVING

- 261 net-acre Wildlight Village Center commenced development in March 2016
- Well positioned in a growing sub-market
- Rayonier owns ~25,000 acres in a 5-mile radius
- Land use entitlements in place to support future growth
- Total Sales Project-To-Date*:
 - Commercial: \$17.7MM gross sales (83 gross ac) (81 net ac)
 - Residential: \$25.6MM gross sales (179 gross & net ac)
- Wildlight Elementary School & Rayonier HQ Office Building completed August 2017
- 6-lane A1A highway and new Interstate 95 interchange completed in 2021

Our strategy is to target Northeast Florida market demand and catalyze value across our significant land holdings over time.

Overview of Pope Real Estate Development Business

Pope Real Estate Portfolio Location Map

Active and Planned Real Estate Projects

1

Gig Harbor – Successful mixed-use community in final stages of development; remaining parcel is an 18.5-acre commercial property.

2

Bremerton – approx. 8-acre business park.

3

Bainbridge – JV partner in multi-family apartment and townhome project.

4

Kingston – Planned 751-unit residential community in Kingston; anticipating 2021-22 launch. (SOLD in Q3 2021 for \$37.5MM.)

5

Port Gamble – company-owned town and prior mill site; future plans for mixed-use development project.

Pope Resources' real estate portfolio is well-positioned to capitalize on Seattle's growing population, job and housing markets.

Appendix

Definitions of Non-GAAP Measures & Pro Forma Items

Adjusted EBITDA is defined as earnings before interest, taxes, depreciation, depletion, amortization, the non-cash cost of land and improved development, non-operating income and expense, operating loss (income) attributable to noncontrolling interests in Timber Funds, costs related to the merger with Pope Resources, timber write-offs resulting from casualty events, the gain on investment in Timber Funds, Fund II Timberland Dispositions, costs related to shareholder litigation, gain on foreign currency derivatives, internal review and restatement costs, net income from discontinued operations and Large Dispositions. Adjusted EBITDA is a non-GAAP measure that management uses to make strategic decisions about the business and that investors can use to evaluate the operational performance of the assets under management. It excludes the impact of specific items that management believes are not indicative of the Company's ongoing operating results.

Cash Available for Distribution (CAD) is defined as cash provided by operating activities adjusted for capital spending (excluding timberland acquisitions and real estate development investments), CAD attributable to noncontrolling interests in Timber Funds, and working capital and other balance sheet changes. CAD is a non-GAAP measure of cash generated during a period that is available for common stock dividends, distributions to Operating Partnership unitholders, distributions to noncontrolling interests, repurchase of the Company's common shares, debt reduction, timberland acquisitions and real estate development investments. CAD is not necessarily indicative of the CAD that may be generated in future periods.

Costs related to shareholder litigation is defined as expenses incurred as a result of the shareholder litigation, shareholder derivative demands and Rayonier's response to an SEC subpoena. See Note 10 - Contingencies of Item 8 - Financial Statements and Supplementary Data in the Company's 2018 Annual Report on Form 10-K.

Gain on foreign currency derivatives is the gain resulting from the foreign exchange derivatives the Company used to mitigate the risk of fluctuations in foreign exchange rates while awaiting the capital contribution to the New Zealand subsidiary.

Fund II Timberland Dispositions represent the disposition of Fund II Timberland assets, which we managed and owned a co-investment stake in.

Fund II Timberland Dispositions attributable to Rayonier represents the proportionate share of Fund II Timberland Dispositions that are attributable to Rayonier.

Gain on investment in Timber Funds reflects the gain recognized on Fund II carried interest incentive fees as well as the gain recognized on the sale of Timber Funds III & IV.

Costs related to the merger with Pope Resources include legal, accounting, due diligence, consulting and other costs related to the merger with Pope Resources.

Large Dispositions are defined as transactions involving the sale of timberland that exceed \$20 million in size and do not have a demonstrable premium relative to timberland value.

Net Debt is calculated as total debt less cash and cash equivalents.

Timber write-offs resulting from casualty events include the write-off of merchantable and pre-merchantable timber volume destroyed by casualty events which cannot be salvaged.

Reconciliation of Net Debt

(\$ in millions)
